AIDA64 Extreme

Navigation

Version	AIDA64 v5.20.3400
Benchmark Module	4.1.633-x64
Homepage	http://www.aida64.com/
Report Type	Report Wizard
Computer	LTRANPHD
Generator	Liem
Operating System	Microsoft Windows 8.1 Professional 6.3.9600.17736 (Win8.1 RTM)
Date	2015-04-29
Time	11:38

Summary

Computer:

Computer Type	ACPI x64-based PC (Mobile)
Operating System	Microsoft Windows 8.1 Professional
OS Service Pack	-
Internet Explorer	11.0.9600.17728
DirectX	DirectX 11.2
Computer Name	LTRANPHD
User Name	Liem
Logon Domain	LTRANPHD
Date / Time	2015-04-29 / 11:38

Motherboard:

CPU Type	Mobile DualCore Intel Core i7-3520M, 3600 MHz (36 x 100)
Motherboard Name	Gateway EG50_HC_HR
Motherboard Chipset	Intel Panther Point HM70, Intel Ivy Bridge
System Memory	16276 MB (DDR3-1600 DDR3 SDRAM)
DIMM1: Kingston 99U5428-018.A00LF	8 GB DDR3-1600 DDR3 SDRAM (11-11-11-28 @ 800 MHz) (10-10-10-27 @ 761 MHz) (9-9-9-24 @ 685 MHz) (8-8-8-22 @ 609 MHz) (7-7-7-19 @ 533 MHz) (6-6-6-16 @ 457 MHz) (5-5-5-14 @ 380 MHz)
DIMM3: Kingston 99U5428-018.A00LF	8 GB DDR3-1600 DDR3 SDRAM (11-11-11-28 @ 800 MHz) (10-10-10-27 @ 761 MHz) (9-9-9-24 @ 685 MHz) (8-8-8-22 @ 609 MHz) (7-7-7-19 @ 533 MHz) (6-6-6-16 @ 457 MHz) (5-5-5-14 @ 380 MHz)
BIOS Type	Insyde (12/16/2013)

Display:

Video Adapter	Intel(R) HD Graphics 4000 (2112 MB)
Video Adapter	Intel(R) HD Graphics 4000 (2112 MB)
Video Adapter	Intel(R) HD Graphics 4000 (2112 MB)
3D Accelerator	Intel HD Graphics 4000
Monitor	AU Optronics B156XW02 V6 [15.6" LCD]

Multimedia:

Audio Adapter	Intel Panther Point HDMI @ Intel Panther Point PCH - High Definition Audio Controller [C-1]
Audio Adapter	Realtek ALC269 @ Intel Panther Point PCH - High Definition Audio Controller [C-1]

Storage:

IDE Controller	Intel(R) 7 Series/C216 Chipset Family SATA AHCI Controller - 1E03
Storage Controller	Microsoft Storage Spaces Controller

Disk Drive	OCZ-AGILITY4 (SATA-III)
Optical Drive	MATSHITA DVD-RAM UJ8C0
SMART Hard Disks Status	OK

Partitions:

C: (NTFS)	276.9 GB (227.6 GB free)
Total Size	276.9 GB (227.6 GB free)

Input:

Keyboard	Standard PS/2 Keyboard
Mouse	HID-compliant mouse
Mouse	PS/2 Compatible Mouse

Network:

Primary IP Address	192.168.1.109
Primary MAC Address	D8-FC-93-E4-C0-EB
Network Adapter	Bluetooth Device (Personal Area Network)
Network Adapter	Broadcom NetLink (TM) Gigabit Ethernet
Network Adapter	Intel(R) Dual Band Wireless-AC 7260 (192.168.1.109)
Network Adapter	Microsoft Wi-Fi Direct Virtual Adapter #4

Peripherals:

Printer	Fax
Printer	Microsoft XPS Document Writer
Printer	Send To OneNote 2013
USB2 Controller	Intel Panther Point PCH - USB 2.0 EHCI Controller #1 [C-1]
USB2 Controller	Intel Panther Point PCH - USB 2.0 EHCI Controller #2 [C-1]
USB Device	Generic Bluetooth Radio
USB Device	Generic USB Hub
USB Device	Generic USB Hub
USB Device	HD Webcam
USB Device	USB Composite Device
USB Device	USB Input Device
Battery	Microsoft AC Adapter
Battery	Microsoft ACPI-Compliant Control Method Battery

DMI:

DMI BIOS Vendor	Gateway
DMI BIOS Version	V2.21
DMI System Manufacturer	Gateway
DMI System Product	NE56R
DMI System Version	V2.21
DMI System Serial Number	NXY1UAA0052191440E1601
DMI System UUID	98097BAD-95BB11E1-B778DC0E-A1B4F190
DMI Motherboard Manufacturer	Gateway
DMI Motherboard Product	EG50_HC_HR
DMI Motherboard Version	Type2 - Board Version
DMI Motherboard Serial Number	Type2 - Board Serial Number
DMI Chassis Manufacturer	Gateway
DMI Chassis Version	V2.21
DMI Chassis Serial Number	NXY1UAA0052191440E1601
DMI Chassis Asset Tag	
DMI Chassis Type	Notebook

DMI Total / Free Memory Sockets	4 / 2

Computer Name

DMI

[BIOS]

BIOS Properties:

Vendor	Gateway
Version	V2.21
Release Date	12/16/2013
Size	3584 KB
System BIOS Version	2.21
Embedded Controller Firmware Version	0.0
Boot Devices	Floppy Disk, Hard Disk, CD-ROM
Capabilities	Flash BIOS, Shadow BIOS, Selectable Boot, EDD, BBS
Supported Standards	DMI, ACPI, UEFI
Expansion Capabilities	PCI, USB
Virtual Machine	No

[System]

System Properties:

Manufacturer	Gateway
Product	NE56R
Version	V2.21
Serial Number	NXY1UAA0052191440E1601
SKU#	NE56R_0649_V2.21
Family	Type1Family
Universal Unique ID	98097BAD-95BB11E1-B778DC0E-A1B4F190
Wake-Up Type	Power Switch

[Motherboard]

Motherboard Properties:

Manufacturer	Gateway
Product	EG50_HC_HR
Version	Type2 - Board Version
Serial Number	Type2 - Board Serial Number
Asset Tag	Type2 - Board Asset Tag

[Chassis]

Chassis Properties:

Manufacturer	Gateway
Version	V2.21
Serial Number	NXY1UAA0052191440E1601
Chassis Type	Notebook
Boot-Up State	Safe
Power Supply State	Safe
Thermal State	Safe
Security Status	None

[Memory Controller]

Memory Controller Properties:

Error Detection Method	None
Error Correction	None
Supported Memory Interleave	1-Way
Current Memory Interleave	1-Way
Maximum Memory Module Size	8192 MB
Memory Slots	4

[Processors / Intel(R) Core(TM) i7-3520M CPU @ 2.90GHz]

Processor Properties:

Manufacturer	Intel(R) Corporation
Version	Intel(R) Core(TM) i7-3520M CPU @ 2.90GHz
Serial Number	To Be Filled By O.E.M.
Asset Tag	To Be Filled By O.E.M.
Part Number	To Be Filled By O.E.M.
External Clock	100 MHz
Maximum Clock	4000 MHz
Current Clock	2900 MHz
Type	Central Processor
Voltage	1.0 V
Status	Enabled
Upgrade	Socket rPGA988B
Socket Designation	U3E1
HTT / CMP Units	2 / 2
Capabilities	64-bit, Multi-Core, Multiple Hardware Threads, Execute Protection, Enhanced Virtualization, Power/Performance Control

CPU Manufacturer:

Company Name	Intel Corporation
Product Information	http://ark.intel.com/search.aspx?q=Intel Core i7-3520M
Driver Update	http://www.aida64.com/driver-updates

[Caches / L1 Cache]

Cache Properties:

Type	Internal
Status	Enabled
Operational Mode	Write-Through
Associativity	8-way Set-Associative
Maximum Size	32 KB
Installed Size	32 KB
Error Correction	Parity
Socket Designation	L1 Cache

[Caches / L1 Cache]

Cache Properties:

Type	Internal
Status	Enabled
Operational Mode	Write-Through
Associativity	8-way Set-Associative
Maximum Size	32 KB
Installed Size	32 KB
Error Correction	Parity
Socket Designation	L1 Cache

[Caches / L2 Cache]

Cache Properties:

Type	Internal
Status	Enabled
Operational Mode	Write-Through
Associativity	8-way Set-Associative
Maximum Size	256 KB
Installed Size	256 KB
Error Correction	Multi-bit ECC
Socket Designation	L2 Cache

[Caches / L3 Cache]

Cache Properties:

Type	Internal
Status	Enabled
Operational Mode	Write-Back
Associativity	16-way Set-Associative
Maximum Size	4096 KB
Installed Size	4096 KB
Error Correction	Multi-bit ECC
Socket Designation	L3 Cache

[Memory Arrays / System Memory]

Memory Array Properties:

Location	Motherboard
Memory Array Function	System Memory
Error Correction	None

Max. Memory Capacity	32 GB
Memory Devices	4

[Memory Modules / DIMM0]

Memory Module Properties:

Socket Designation	DIMM0
Type	DIMM
Installed Size	8192 MB
Enabled Size	8192 MB

[Memory Modules / DIMM1]

Memory Module Properties:

Socket Designation	DIMM1
Type	DIMM
Installed Size	Not Installed
Enabled Size	Not Installed

[Memory Modules / DIMM1]

Memory Module Properties:

Socket Designation	DIMM1
Type	DIMM
Installed Size	8192 MB
Enabled Size	8192 MB

[Memory Modules / DIMM3]

Memory Module Properties:

Socket Designation	DIMM3
Type	DIMM
Installed Size	Not Installed
Enabled Size	Not Installed

[Memory Devices / DIMM0]

Memory Device Properties:

Form Factor	SODIMM
Type	DDR3
Type Detail	Synchronous
Size	8 GB
Max. Clock Speed	1600 MHz
Current Clock Speed	1600 MHz
Total Width	64-bit
Data Width	64-bit
Ranks	2
Device Locator	DIMM0
Bank Locator	BANK 0
Manufacturer	Kingston
Serial Number	5E290E52
Asset Tag	Unknown

Part Number	99U5428-018.A00LF

[Memory Devices / DIMM1]

Memory Device Properties:

Form Factor	DIMM
Device Locator	DIMM1
Bank Locator	BANK 1
Manufacturer	Empty
Serial Number	Empty
Asset Tag	Unknown
Part Number	Empty

[Memory Devices / DIMM1]

Memory Device Properties:

Form Factor	SODIMM
Type	DDR3
Type Detail	Synchronous
Size	8 GB
Max. Clock Speed	1600 MHz
Current Clock Speed	1600 MHz
Total Width	64-bit
Data Width	64-bit
Ranks	2
Device Locator	DIMM1
Bank Locator	BANK 2
Manufacturer	Kingston
Serial Number	5F290052
Asset Tag	Unknown
Part Number	99U5428-018.A00LF

[Memory Devices / DIMM3]

Memory Device Properties:

Form Factor	DIMM
Device Locator	DIMM3
Bank Locator	BANK 3
Manufacturer	Empty
Serial Number	Empty
Asset Tag	Unknown
Part Number	Empty

[System Slots / J5C1]

System Slot Properties:

Slot Designation	J5C1
Type	PCI-E x16
Usage	Empty
Data Bus Width	x16

[System Slots / J6C1]

System Slot Properties:

Slot Designation	J6C1
Type	PCI-E x1
Usage	Empty
Data Bus Width	x1

[System Slots / J6C2]

System Slot Properties:

Slot Designation	J6C2
Type	PCI-E x1
Usage	Empty
Data Bus Width	x1

[System Slots / J6D2]

System Slot Properties:

Slot Designation	J6D2
Type	PCI-E x1
Usage	Empty
Data Bus Width	x1

[System Slots / J7C1]

System Slot Properties:

Slot Designation	J7C1
Type	PCI-E x1
Usage	Empty
Data Bus Width	x1

[System Slots / J7D2]

System Slot Properties:

Slot Designation	J7D2
Type	PCI-E x1
Usage	Empty
Data Bus Width	x1

[System Slots / J8C1]

System Slot Properties:

Slot Designation	J8C1
Type	PCI-E x1
Usage	Empty
Data Bus Width	x1

[System Slots / J8C2]

System Slot Properties:

Slot Designation	J8C2
Type	PCI-E x16

Usage	Empty
Data Bus Width	x16

[On-Board Devices / Video Graphics Controller]

On-Board Device Properties:

Description	Video Graphics Controller
Type	Video
Status	Enabled

[On-Board Devices / Lan Controller]

On-Board Device Properties:

Description	Lan Controller
Type	Ethernet
Status	Enabled

[Miscellaneous]

Miscellaneous:

OEM String	String1 for Original Equipment Manufacturer
OEM String	String2 for Original Equipment Manufacturer
OEM String	String3 for Original Equipment Manufacturer
OEM String	String4 for Original Equipment Manufacturer
OEM String	String5 for Original Equipment Manufacturer
System Configuration Option	String2 for Type12 Equipment Manufacturer
System Configuration Option	String3 for Type12 Equipment Manufacturer
System Configuration Option	String4 for Type12 Equipment Manufacturer

Overclock

CPU Properties:

CPU Type	Mobile DualCore Intel Core i7-3520M
CPU Alias	Ivy Bridge-MB
CPU Stepping	E1/L1/N0/P0
Engineering Sample	No
CPUID CPU Name	Intel(R) Core(TM) i7-3520M CPU @ 2.90GHz
CPUID Revision	000306A9h
CPU VID	1.1859 V

CPU Speed:

CPU Clock	3392.4 MHz (original: 2900 MHz, overclock: 17%)
CPU Multiplier	34x
CPU FSB	99.8 MHz (original: 100 MHz)
North Bridge Clock	3392.4 MHz
Memory Bus	798.2 MHz
DRAM:FSB Ratio	24:3

CPU Cache:

L1 Code Cache	32 KB per core
L1 Data Cache	32 KB per core

L2 Cache	256 KB per core (On-Die, ECC, Full-Speed)
L3 Cache	4 MB (On-Die, ECC, Full-Speed)

Motherboard Properties:

Motherboard ID	<DMI>
Motherboard Name	Gateway EG50_HC_HR

Chipset Properties:

Motherboard Chipset	Intel Panther Point HM70, Intel Ivy Bridge
Memory Timings	11-11-11-28 (CL-RCD-RP-RAS)
Command Rate (CR)	1T
DIMM1: Kingston 99U5428-018.A00LF	8 GB DDR3-1600 DDR3 SDRAM (11-11-11-28 @ 800 MHz) (10-10-10-27 @ 761 MHz) (9-9-9-24 @ 685 MHz) (8-8-8-22 @ 609 MHz) (7-7-7-19 @ 533 MHz) (6-6-6-16 @ 457 MHz) (5-5-5-14 @ 380 MHz)
DIMM3: Kingston 99U5428-018.A00LF	8 GB DDR3-1600 DDR3 SDRAM (11-11-11-28 @ 800 MHz) (10-10-10-27 @ 761 MHz) (9-9-9-24 @ 685 MHz) (8-8-8-22 @ 609 MHz) (7-7-7-19 @ 533 MHz) (6-6-6-16 @ 457 MHz) (5-5-5-14 @ 380 MHz)

BIOS Properties:

System BIOS Date	12/16/2013
Video BIOS Date	03/14/12
DMI BIOS Version	V2.21

Graphics Processor Properties:

Video Adapter	Intel Ivy Bridge-MB - Integrated Graphics Controller (MB GT2)
GPU Code Name	Ivy Bridge-MB GT2 (Integrated 8086 / 0166, Rev 09)
GPU Clock	349 MHz (original: 649 MHz)

Power Management

Power Management Properties:

Current Power Source	AC Line
Battery Status	100 % (High Level)
Full Battery Lifetime	Unknown
Remaining Battery Lifetime	Unknown

Battery Properties:

Device Name	Li_Ion_4000mA
Manufacturer	PANASONIC
Serial Number	8E9
Unique ID	8E9PANASONIC Li_Ion_4000mA
Battery Type	Rechargeable Li-Ion
Designed Capacity	47520 mWh
Fully Charged Capacity	38081 mWh
Current Capacity	38081 mWh (100 %)
Battery Voltage	12.386 V
Wear Level	19 %
Power State	AC Line

Portable Computer

Centrino (Carmel) Platform Compliancy:

CPU: Intel Pentium M (Banias/Dothan)	No (Mobile Intel Core i7-3520M)
Chipset: Intel i855GM/PM	No (Intel Panther Point HM70, Intel Ivy Bridge)
WLAN: Intel PRO/Wireless	No
System: Centrino Compliant	No

Centrino (Sonoma) Platform Compliancy:

CPU: Intel Pentium M (Dothan)	No (Mobile Intel Core i7-3520M)
Chipset: Intel i915GM/PM	No (Intel Panther Point HM70, Intel Ivy Bridge)
WLAN: Intel PRO/Wireless 2200/2915	No
System: Centrino Compliant	No

Centrino (Napa) Platform Compliancy:

CPU: Intel Core (Yonah) / Core 2 (Merom)	No (Mobile Intel Core i7-3520M)
Chipset: Intel i945GM/PM	No (Intel Panther Point HM70, Intel Ivy Bridge)
WLAN: Intel PRO/Wireless 3945/3965	No
System: Centrino Compliant	No

Centrino (Santa Rosa) Platform Compliancy:

CPU: Intel Core 2 (Merom/Penryn)	No (Mobile Intel Core i7-3520M)
Chipset: Intel GM965/PM965	No (Intel Panther Point HM70, Intel Ivy Bridge)
WLAN: Intel Wireless WiFi Link 4965	No
System: Centrino Compliant	No

Centrino 2 (Montevina) Platform Compliancy:

CPU: Intel Core 2 (Penryn)	No (Mobile Intel Core i7-3520M)
Chipset: Mobile Intel 4 Series	No (Intel Panther Point HM70, Intel Ivy Bridge)
WLAN: Intel WiFi Link 5000 Series	No
System: Centrino 2 Compliant	No

Centrino (Calpella) Platform Compliancy:

CPU: Intel Core i3/i5/i7 (Arrandale/Clarksfield)	No (Mobile Intel Core i7-3520M)
Chipset: Mobile Intel 5 Series	No (Intel Panther Point HM70, Intel Ivy Bridge)
WLAN: Intel Centrino Advanced-N / Ultimate-N / Wireless-N	No
System: Centrino Compliant	No

Centrino (Huron River) Platform Compliancy:

CPU: Intel Core i3/i5/i7 (Sandy Bridge-MB)	No (Mobile Intel Core i7-3520M)
Chipset: Mobile Intel 6 Series	No (Intel Panther Point HM70, Intel Ivy Bridge)
WLAN: Intel Centrino Advanced-N / Ultimate-N / Wireless-N	No
System: Centrino Compliant	No

Centrino (Chief River) Platform Compliancy:

CPU: Intel Core i3/i5/i7 (Ivy Bridge-MB)	Yes (Mobile Intel Core i7-3520M)
Chipset: Mobile Intel 7 Series	Yes (Intel Panther Point HM70, Intel Ivy Bridge)
WLAN: Intel Centrino Advanced-N / Ultimate-N / Wireless-N	No
System: Centrino Compliant	No

Centrino (Shark Bay-MB) Platform Compliancy:

CPU: Intel Core i3/i5/i7 (Haswell-MB)	No (Mobile Intel Core i7-3520M)
Chipset: Mobile Intel 8/9 Series	No (Intel Panther Point HM70, Intel Ivy Bridge)
WLAN: Intel Centrino Advanced-N / Ultimate-N / Wireless-N	Yes
System: Centrino Compliant	No

Sensor

Sensor Properties:

Sensor Type	CPU, PCH, SNB

Temperatures:

CPU Package	54 °C (129 °F)
CPU IA Cores	52 °C (126 °F)
CPU GT Cores	54 °C (129 °F)
CPU #1 / Core #1	55 °C (131 °F)
CPU #1 / Core #2	54 °C (129 °F)
PCH Diode	60 °C (140 °F)

Voltage Values:

CPU Core	1.166 V
Battery	12.386 V

Power Values:

CPU Package	3.69 W
CPU IA Cores	1.44 W
CPU GT Cores	0.00 W
CPU Uncore	2.25 W
Battery Charge Rate	AC Line

CPU

CPU Properties:

CPU Type	Mobile DualCore Intel Core i7-3520M, 3600 MHz (36 x 100)
CPU Alias	Ivy Bridge-MB
CPU Stepping	E1/L1/N0/P0
Instruction Set	x86, x86-64, MMX, SSE, SSE2, SSE3, SSSE3, SSE4.1, SSE4.2, AVX, AES
Original Clock	2900 MHz
Min / Max CPU Multiplier	12x / 33x
Engineering Sample	No
L1 Code Cache	32 KB per core
L1 Data Cache	32 KB per core
L2 Cache	256 KB per core (On-Die, ECC, Full-Speed)
L3 Cache	4 MB (On-Die, ECC, Full-Speed)

CPU Physical Info:

Package Type	988 Pin rPGA
Package Size	37.5 mm x 37.5 mm
Process Technology	22 nm, CMOS, Cu, High-K + Metal Gate
Typical Power	35 W

CPU Manufacturer:

Company Name	Intel Corporation
Product Information	http://ark.intel.com/search.aspx?q=Intel Core i7-3520M
Driver Update	http://www.aida64.com/driver-updates

Multi CPU:

Motherboard ID	Insyde Calpella
CPU #1	Intel(R) Core(TM) i7-3520M CPU @ 2.90GHz, 2893 MHz
CPU #2	Intel(R) Core(TM) i7-3520M CPU @ 2.90GHz, 2893 MHz
CPU #3	Intel(R) Core(TM) i7-3520M CPU @ 2.90GHz, 2893 MHz
CPU #4	Intel(R) Core(TM) i7-3520M CPU @ 2.90GHz, 2893 MHz

CPU Utilization:

CPU #1 / Core #1 / HTT Unit #1	0%
CPU #1 / Core #1 / HTT Unit #2	0%
CPU #1 / Core #2 / HTT Unit #1	0%
CPU #1 / Core #2 / HTT Unit #2	0%

CPUID

CPUID Properties:

CPUID Manufacturer	GenuineIntel
CPUID CPU Name	Intel(R) Core(TM) i7-3520M CPU @ 2.90GHz
CPUID Revision	000306A9h
IA Brand ID	00h (Unknown)
Platform ID	29h / MC 10h (rPGA988B)
Microcode Update Revision	1Bh
HTT / CMP Units	2 / 2
Tjmax Temperature	105 °C (221 °F)
CPU Thermal Design Power	35 W
CPU IA Cores Thermal Design Current	112 A
CPU GT Cores Thermal Design Current	50 A
CPU Max Power Limit	Unlimited Power / Unlimited Time
CPU Power Limit 1 (Long Duration)	35 W / 28.00 sec (Locked)
CPU Power Limit 2 (Short Duration)	43.8 W / Unlimited Time (Locked)
Max Turbo Boost Multipliers	1C: 36x, 2C: 34x

Instruction Set:

64-bit x86 Extension (AMD64, Intel64)	Supported
AMD 3DNow!	Not Supported
AMD 3DNow! Professional	Not Supported
AMD 3DNowPrefetch	Not Supported
AMD Enhanced 3DNow!	Not Supported
AMD Extended MMX	Not Supported
AMD FMA4	Not Supported
AMD MisAligned SSE	Not Supported
AMD SSE4A	Not Supported
AMD XOP	Not Supported
Cyrix Extended MMX	Not Supported
Enhanced REP MOVSB/STOSB	Supported
Float-16 Conversion Instructions	Supported, Enabled
IA-64	Not Supported
IA AES Extensions	Supported
IA AVX	Supported, Enabled
IA AVX2	Not Supported
IA AVX-512 (AVX512F)	Not Supported
IA AVX-512 52-bit Integer Instructions (AVX512IFMA52)	Not Supported

IA AVX-512 Byte and Word Instructions (AVX512BW)	Not Supported
IA AVX-512 Conflict Detection Instructions (AVX512CD)	Not Supported
IA AVX-512 Doubleword and Quadword Instructions (AVX512DQ)	Not Supported
IA AVX-512 Exponential and Reciprocal Instructions (AVX512ER)	Not Supported
IA AVX-512 Prefetch Instructions (AVX512PF)	Not Supported
IA AVX-512 Vector Bit Manipulation Instructions (AVX512VBMI)	Not Supported
IA AVX-512 Vector Length Extensions (AVX512VL)	Not Supported
IA BMI1	Not Supported
IA BMI2	Not Supported
IA FMA	Not Supported
IA MMX	Supported
IA SHA Extensions	Not Supported
IA SSE	Supported
IA SSE2	Supported
IA SSE3	Supported
IA Supplemental SSE3	Supported
IA SSE4.1	Supported
IA SSE4.2	Supported
VIA Alternate Instruction Set	Not Supported
ADCX / ADOX Instruction	Not Supported
CLFLUSH Instruction	Supported
CLFLUSHOPT Instruction	Not Supported
CLWB Instruction	Not Supported
CMPXCHG8B Instruction	Supported
CMPXCHG16B Instruction	Supported
Conditional Move Instruction	Supported
INVPCID Instruction	Not Supported
LAHF / SAHF Instruction	Supported
LZCNT Instruction	Not Supported
MONITOR / MWAIT Instruction	Supported
MONITORX / MWAITX Instruction	Not Supported
MOVBE Instruction	Not Supported
PCLMULQDQ Instruction	Supported
PCOMMIT Instruction	Not Supported
POPCNT Instruction	Supported
PREFETCHWT1 Instruction	Not Supported
RDFSBASE / RDGSBASE / WRFSBASE / WRGSBASE Instruction	Supported
RDRAND Instruction	Supported
RDSEED Instruction	Not Supported
RDTSCP Instruction	Supported
SKINIT / STGI Instruction	Not Supported
SYSCALL / SYSRET Instruction	Not Supported
SYSENTER / SYSEXIT Instruction	Supported
Trailing Bit Manipulation Instructions	Not Supported
VIA FEMMS Instruction	Not Supported

Security Features:

Advanced Cryptography Engine (ACE)	Not Supported
Advanced Cryptography Engine 2 (ACE2)	Not Supported
Data Execution Prevention (DEP, NX, EDB)	Supported
Hardware Random Number Generator (RNG)	Not Supported
Hardware Random Number Generator 2 (RNG2)	Not Supported
Memory Protection Extensions (MPX)	Not Supported
PadLock Hash Engine (PHE)	Not Supported

PadLock Hash Engine 2 (PHE2)	Not Supported
PadLock Montgomery Multiplier (PMM)	Not Supported
PadLock Montgomery Multiplier 2 (PMM2)	Not Supported
Processor Serial Number (PSN)	Not Supported
Safer Mode Extensions (SMX)	Supported
Software Guard Extensions (SGX)	Not Supported
Supervisor Mode Access Prevention (SMAP)	Not Supported
Supervisor Mode Execution Protection (SMEP)	Supported

Power Management Features:

Application Power Management (APM)	Not Supported
Automatic Clock Control	Supported
Core C6 State (CC6)	Not Supported
Digital Thermometer	Supported
Dynamic FSB Frequency Switching	Not Supported
Enhanced Halt State (C1E)	Supported, Enabled
Enhanced SpeedStep Technology (EIST, ESS)	Supported, Enabled
Frequency ID Control	Not Supported
Hardware P-State Control	Not Supported
Hardware Thermal Control (HTC)	Not Supported
LongRun	Not Supported
LongRun Table Interface	Not Supported
Overstress	Not Supported
Package C6 State (PC6)	Not Supported
Parallax	Not Supported
PowerSaver 1.0	Not Supported
PowerSaver 2.0	Not Supported
PowerSaver 3.0	Not Supported
Processor Duty Cycle Control	Supported
Software Thermal Control	Not Supported
Temperature Sensing Diode	Not Supported
Thermal Monitor 1	Supported
Thermal Monitor 2	Supported
Thermal Monitor 3	Not Supported
Thermal Monitoring	Not Supported
Thermal Trip	Not Supported
Voltage ID Control	Not Supported

Virtualization Features:

Extended Page Table (EPT)	Supported
Hypervisor	Not Present
INVEPT Instruction	Supported
INVVPID Instruction	Supported
Nested Paging (NPT, RVI)	Not Supported
Secure Virtual Machine (SVM, Pacifica)	Not Supported
Virtual Machine Extensions (VMX, Vanderpool)	Supported
Virtual Processor ID (VPID)	Supported

CPUID Features:

1 GB Page Size	Not Supported
36-bit Page Size Extension	Supported
64-bit DS Area	Supported
Adaptive Overclocking	Not Supported
Address Region Registers (ARR)	Not Supported

Configurable TDP (cTDP)	Not Supported
Core Performance Boost (CPB)	Not Supported
Core Performance Counters	Not Supported
CPL Qualified Debug Store	Supported
Data Breakpoint Extension	Not Supported
Debug Trace Store	Supported
Debugging Extension	Supported
Deprecated FPU CS and FPU DS	Not Supported
Direct Cache Access	Not Supported
Dynamic Acceleration Technology (IDA)	Not Supported
Dynamic Configurable TDP (DcTDP)	Not Supported
Extended APIC Register Space	Not Supported
Fast Save & Restore	Supported
Hardware Lock Elision (HLE)	Not Supported
Hybrid Boost	Not Supported
Hyper-Threading Technology (HTT)	Supported, Enabled
Instruction Based Sampling	Not Supported
Invariant Time Stamp Counter	Supported
L1 Context ID	Not Supported
L2I Performance Counters	Not Supported
Lightweight Profiling	Not Supported
Local APIC On Chip	Supported
Machine Check Architecture (MCA)	Supported
Machine Check Exception (MCE)	Supported
Memory Configuration Registers (MCR)	Not Supported
Memory Type Range Registers (MTRR)	Supported
Model Specific Registers (MSR)	Supported
NB Performance Counters	Not Supported
Page Attribute Table (PAT)	Supported
Page Global Extension	Supported
Page Size Extension (PSE)	Supported
Pending Break Event (PBE)	Supported
Performance Time Stamp Counter (PTSC)	Not Supported
Physical Address Extension (PAE)	Supported
Platform Quality of Service Enforcement (PQE)	Not Supported
Platform Quality of Service Monitoring (PQM)	Not Supported
Process Context Identifiers (PCID)	Supported
Processor Feedback Interface	Not Supported
Processor Trace (PT)	Not Supported
Restricted Transactional Memory (RTM)	Not Supported
Self-Snoop	Supported
Time Stamp Counter (TSC)	Supported
Turbo Boost	Supported, Enabled
Virtual Mode Extension	Supported
Watchdog Timer	Not Supported
x2APIC	Supported, Enabled
XGETBV / XSETBV OS Enabled	Supported
XSAVE / XRSTOR / XSETBV / XGETBV Extended States	Supported
XSAVEOPT	Supported

Motherboard

Motherboard Properties:

Motherboard ID	<DMI>
Motherboard Name	Gateway EG50_HC_HR

Front Side Bus Properties:

Bus Type	BCLK
Real Clock	100 MHz
Effective Clock	100 MHz

Memory Bus Properties:

Bus Type	Dual DDR3 SDRAM
Bus Width	128-bit
DRAM:FSB Ratio	24:3
Real Clock	800 MHz (DDR)
Effective Clock	1600 MHz
Bandwidth	25600 MB/s

Chipset Bus Properties:

Bus Type	Intel Direct Media Interface v2.0

Memory

Physical Memory:

Total	16276 MB
Used	1842 MB
Free	14435 MB
Utilization	11 %

Swap Space:

Total	18708 MB
Used	2253 MB
Free	16456 MB
Utilization	12 %

Virtual Memory:

Total	34985 MB
Used	4094 MB
Free	30891 MB
Utilization	12 %

Paging File:

Paging File	C:\pagefile.sys
Current Size	2432 MB
Current / Peak Usage	0 MB / 0 MB
Utilization	0 %

Physical Address Extension (PAE):

Supported by Operating System	Yes
Supported by CPU	Yes
Active	Yes

SPD

[DIMM1: Kingston 99U5428-018.A00LF]

Memory Module Properties:

Module Name	Kingston 99U5428-018.A00LF
Serial Number	5E290E52h (1376659806)
Manufacture Date	Week 4 / 2015
Module Size	8 GB (2 ranks, 8 banks)
Module Type	SO-DIMM
Memory Type	DDR3 SDRAM
Memory Speed	DDR3-1600 (800 MHz)
Module Width	64 bit
Module Voltage	1.35 V / 1.5 V
Error Detection Method	None
Refresh Rate	Normal (7.8 us)

Memory Timings:

@ 800 MHz	11-11-11-28 (CL-RCD-RP-RAS) / 39-208-5-12-6-6-24 (RC-RFC-RRD-WR-WTR-RTP-FAW)
@ 761 MHz	10-10-10-27 (CL-RCD-RP-RAS) / 37-199-5-12-6-6-23 (RC-RFC-RRD-WR-WTR-RTP-FAW)
@ 685 MHz	9-9-9-24 (CL-RCD-RP-RAS) / 33-179-5-11-6-6-21 (RC-RFC-RRD-WR-WTR-RTP-FAW)
@ 609 MHz	8-8-8-22 (CL-RCD-RP-RAS) / 30-159-4-10-5-5-19 (RC-RFC-RRD-WR-WTR-RTP-FAW)
@ 533 MHz	7-7-7-19 (CL-RCD-RP-RAS) / 26-139-4-8-4-4-16 (RC-RFC-RRD-WR-WTR-RTP-FAW)
@ 457 MHz	6-6-6-16 (CL-RCD-RP-RAS) / 22-119-3-7-4-4-14 (RC-RFC-RRD-WR-WTR-RTP-FAW)
@ 380 MHz	5-5-5-14 (CL-RCD-RP-RAS) / 19-100-3-6-3-3-12 (RC-RFC-RRD-WR-WTR-RTP-FAW)

Memory Module Features:

Auto Self Refresh (ASR)	Not Supported
DLL-Off Mode	Supported
Extended Temperature Range	Supported
Extended Temperature 1X Refresh Rate	Not Supported
On-Die Thermal Sensor Readout (ODTS)	Not Supported
Partial Array Self Refresh (PASR)	Supported
RZQ/6	Supported
RZQ/7	Supported

Memory Module Manufacturer:

Company Name	Kingston Technology Corporation
Product Information	http://www.kingston.com/products/default.asp

[DIMM3: Kingston 99U5428-018.A00LF]

Memory Module Properties:

Module Name	Kingston 99U5428-018.A00LF
Serial Number	5F290052h (1375742303)
Manufacture Date	Week 4 / 2015
Module Size	8 GB (2 ranks, 8 banks)
Module Type	SO-DIMM
Memory Type	DDR3 SDRAM
Memory Speed	DDR3-1600 (800 MHz)
Module Width	64 bit
Module Voltage	1.35 V / 1.5 V

Error Detection Method	None
Refresh Rate	Normal (7.8 us)

Memory Timings:

@ 800 MHz	11-11-11-28 (CL-RCD-RP-RAS) / 39-208-5-12-6-6-24 (RC-RFC-RRD-WR-WTR-RTP-FAW)
@ 761 MHz	10-10-10-27 (CL-RCD-RP-RAS) / 37-199-5-12-6-6-23 (RC-RFC-RRD-WR-WTR-RTP-FAW)
@ 685 MHz	9-9-9-24 (CL-RCD-RP-RAS) / 33-179-5-11-6-6-21 (RC-RFC-RRD-WR-WTR-RTP-FAW)
@ 609 MHz	8-8-8-22 (CL-RCD-RP-RAS) / 30-159-4-10-5-5-19 (RC-RFC-RRD-WR-WTR-RTP-FAW)

@ 457 MHz	6-6-6-16 (CL-RCD-RP-RAS) / 22-119-3-7-4-4-14 (RC-RFC-RRD-WR-WTR-RTP-FAW)
@ 380 MHz	5-5-5-14 (CL-RCD-RP-RAS) / 19-100-3-6-3-3-12 (RC-RFC-RRD-WR-WTR-RTP-FAW)

Memory Module Features:

Auto Self Refresh (ASR)	Not Supported
DLL-Off Mode	Supported
Extended Temperature Range	Supported
Extended Temperature 1X Refresh Rate	Not Supported
On-Die Thermal Sensor Readout (ODTS)	Not Supported
Partial Array Self Refresh (PASR)	Supported
RZQ/6	Supported
RZQ/7	Supported

Memory Module Manufacturer:

Company Name	Kingston Technology Corporation
Product Information	http://www.kingston.com/products/default.asp

Chipset

[North Bridge: Intel Ivy Bridge-MB IMC]

North Bridge Properties:

North Bridge	Intel Ivy Bridge-MB IMC
Intel Platform	Chief River
Supported Memory Types	DDR3-1066, DDR3-1333, DDR3-1600, DDR3-1866 SDRAM
Maximum Memory Amount	16 GB
Revision	09
Process Technology	22 nm
VT-d	Supported
Extended APIC (x2APIC)	Supported

Memory Controller:

Type	Dual Channel (128-bit)
Active Mode	Dual Channel (128-bit)

Memory Timings:

CAS Latency (CL)	11T
RAS To CAS Delay (tRCD)	11T
RAS Precharge (tRP)	11T
RAS Active Time (tRAS)	28T
Row Refresh Cycle Time (tRFC)	208T
Command Rate (CR)	1T

RAS To RAS Delay (tRRD)	5T
Write Recovery Time (tWR)	12T
Read To Read Delay (tRTR)	Same Rank: 4T, Different Rank: 1T, Different DIMM: 3T
Read To Write Delay (tRTW)	Same Rank: 3T, Different Rank: 5T, Different DIMM: 5T
Write To Read Delay (tWTR)	6T, Different Rank: 1T, Different DIMM: 1T
Write To Write Delay (tWTW)	Same Rank: 4T, Different Rank: 3T, Different DIMM: 3T
Read To Precharge Delay (tRTP)	6T
Four Activate Window Delay (tFAW)	24T
Write CAS Latency (tWCL)	8T
CKE Min. Pulse Width (tCKE)	4T
Refresh Period (tREF)	6240T
Round Trip Latency (tRTL)	DIMM1: 39T, DIMM2: 32T, DIMM3: 40T, DIMM4: 32T
I/O Latency (tIOL)	DIMM2: 0T, DIMM3: 3T, DIMM4: 0T
Burst Length (BL)	8

Error Correction:

ECC	Not Supported
ChipKill ECC	Not Supported
RAID	Not Supported
ECC Scrubbing	Not Supported

Memory Slots:

DRAM Slot #1	8 GB (DDR3-1600 DDR3 SDRAM)
DRAM Slot #2	8 GB (DDR3-1600 DDR3 SDRAM)

Integrated Graphics Controller:

Graphics Controller Type	Intel HD Graphics 4000
Graphics Controller Status	Enabled
Graphics Frame Buffer Size	64 MB

Chipset Manufacturer:

Company Name	Intel Corporation
Product Information	http://www.intel.com/products/chipsets
Driver Download	http://support.intel.com/support/chipsets
BIOS Upgrades	http://www.aida64.com/bios-updates

[South Bridge: Intel Panther Point HM70]

South Bridge Properties:

South Bridge	Intel Panther Point HM70
Intel Platform	Chief River
Revision / Stepping	04 / C1
Package Type	989 Pin FC-BGA
Package Size	25 mm x 25 mm
Process Technology	65 nm
Die Size	100.73 mm2
Core Voltage	1.05 V
TDP	4.1 W

High Definition Audio:

Codec Name	Realtek ALC269
Codec ID	10EC0269h / 10250649h
Codec Revision	1001h

Codec Type	Audio

High Definition Audio:

Codec Name	Intel Panther Point HDMI
Codec ID	80862806h / 80860101h
Codec Revision	1000h
Codec Type	Audio

PCI Express Controller:

PCI-E 2.0 x1 port #1	In Use @ x1 (Broadcom NetLink BCM57785 PCI-E Gigabit Ethernet Controller, Broadcom SD Card Reader)
PCI-E 2.0 x1 port #2	In Use @ x1 (Intel Dual Band Wireless-AC 7260 AC 2x2 HMC WiFi Adapter)

Operating System

Operating System Properties:

OS Name	Microsoft Windows 8.1 Professional
OS Language	English (United States)
OS Installer Language	English (United States)
OS Kernel Type	Multiprocessor Free (64-bit)
OS Version	6.3.9600.17736 (Win8.1 RTM)
OS Service Pack	-
OS Installation Date	4/10/2015
OS Root	C:\Windows

License Information:

Registered Owner	Liem
Registered Organization	
Product ID	00260-00358-16728-AA747
Product Key	
Product Activation (WPA)	Required

Current Session:

Computer Name	LTRANPHD
User Name	Liem
Logon Domain	LTRANPHD
UpTime	261 sec (0 days, 0 hours, 4 min, 21 sec)

Components Version:

Common Controls	6.16
Windows Mail	6.3.9600.16384 (winblue_rtm.130821-1623)
Windows Media Player	12.0.9600.16384 (winblue_rtm.130821-1623)
Windows Messenger	-
MSN Messenger	-
Internet Information Services (IIS)	-
.NET Framework	4.0.30319.33440 built by: FX45W81RTMREL
Novell Client	-
DirectX	DirectX 11.2
OpenGL	6.3.9600.17415 (winblue_r4.141028-1500)
ASPI	-

Operating System Features:

Debug Version	No
DBCS Version	No
Domain Controller	No
Security Present	No
Network Present	Yes
Remote Session	No
Safe Mode	No
Slow Processor	No
Terminal Services	Yes

State/Province	Greater Manchester

Public Key Properties:

Public Key Algorithm	RSA (1.2.840.113549.1.1.1)

[Certificate Authorities / Entrust Certification Authority - L1C]

Certificate Properties:

Version	V3
Signature Algorithm	SHA1 RSA (1.2.840.113549.1.1.5)
Serial Number	39 8C 0E 4C
Validity	11/11/2011 - 11/11/2021

Issuer Properties:

Common Name	Entrust.net Certification Authority (2048)
Organization	Entrust.net
Organizational Unit	www.entrust.net/CPS_2048 incorp. by ref. (limits liab.)
Organizational Unit	(c) 1999 Entrust.net Limited

Subject Properties:

Common Name	Entrust Certification Authority - L1C
Organization	Entrust, Inc.
Organizational Unit	www.entrust.net/rpa is incorporated by reference
Organizational Unit	(c) 2009 Entrust, Inc.

Country	United States

Public Key Properties:

Public Key Algorithm	RSA (1.2.840.113549.1.1.1)

[Certificate Authorities / Microsoft Update Secure Server CA 2.1]

Certificate Properties:

Version	V3
Signature Algorithm	SHA256 RSA (1.2.840.113549.1.1.11)
Serial Number	0A 00 00 00 00 00 DF A5 50 0A C8 A2 91 B8 0A 00 00 00 00 33
Validity	6/21/2012 - 6/21/2027

Issuer Properties:

Common Name	Microsoft Root Certificate Authority 2011
Organization	Microsoft Corporation
Country	United States
Locality Name	Redmond
State/Province	Washington

Subject Properties:

Common Name	Microsoft Update Secure Server CA 2.1
Organization	Microsoft Corporation
Country	United States
Locality Name	Redmond
State/Province	Washington

Public Key Properties:

Public Key Algorithm	RSA (1.2.840.113549.1.1.1)

[Certificate Authorities / Microsoft Windows Hardware Compatibility]

Certificate Properties:

Version	V3
Signature Algorithm	MD5 RSA (1.2.840.113549.1.1.4)
Serial Number	A0 69 FE 8F 9A 3F D1 11 8B 19
Validity	10/1/1997 - 12/31/2002

Issuer Properties:

Common Name	Microsoft Root Authority
Organizational Unit	Copyright (c) 1997 Microsoft Corp.
Organizational Unit	Microsoft Corporation

Subject Properties:

Common Name	Microsoft Windows Hardware Compatibility
Organizational Unit	Copyright (c) 1997 Microsoft Corp.
Organizational Unit	Microsoft Windows Hardware Compatibility Intermediate CA
Organizational Unit	Microsoft Corporation

Public Key Properties:

Public Key Algorithm	RSA (1.2.840.113549.1.1.1)

[Certificate Authorities / Root Agency]

Certificate Properties:

Version	V3
Signature Algorithm	MD5 RSA (1.2.840.113549.1.1.4)
Serial Number	F4 35 5C AA D4 B8 CF 11 8A 64 00 AA 00 6C 37 06
Validity	5/28/1996 - 12/31/2039

Issuer Properties:

Common Name	Root Agency

Subject Properties:

Common Name	Root Agency

Public Key Properties:

Public Key Algorithm	RSA (1.2.840.113549.1.1.1)

[Certificate Authorities / UTN-USERFirst-Hardware]

Certificate Properties:

Version	V3
Signature Algorithm	SHA1 RSA (1.2.840.113549.1.1.5)
Serial Number	25 97 49 35 74 A2 D1 43 13 D7 C7 AA F1 AC 4B 48
Validity	6/7/2005 - 5/30/2020

Issuer Properties:

Common Name	AddTrust External CA Root
Organization	AddTrust AB
Organizational Unit	AddTrust External TTP Network
Country	Sweden

Subject Properties:

Common Name	UTN-USERFirst-Hardware
Organization	The USERTRUST Network
Organizational Unit	http://www.usertrust.com
Country	United States
Locality Name	Salt Lake City
State/Province	UT

Public Key Properties:

Public Key Algorithm	RSA (1.2.840.113549.1.1.1)

[Certificate Authorities / VeriSign Class 3 International Server CA - G3]

Certificate Properties:

Version	V3
Signature Algorithm	SHA1 RSA (1.2.840.113549.1.1.5)
Serial Number	67 7E D6 95 2D 4D 2D F3 13 08 02 CE 20 E8 1B 64
Validity	2/7/2010 - 2/7/2020

Issuer Properties:

Common Name	VeriSign Class 3 Public Primary Certification Authority - G5
Organization	VeriSign, Inc.
Organizational Unit	VeriSign Trust Network
Organizational Unit	(c) 2006 VeriSign, Inc. - For authorized use only

Country	United States

Local Groups

[Access Control Assistance Operators]

Local Group Properties:

Comment	Members of this group can remotely query authorization attributes and permissions for resources on this computer.

[Administrators]

Local Group Properties:
Comment Administrators have complete and unrestricted access to the computer/domain

Group Members:
Administrator
Liem

[Backup Operators]

Local Group Properties:
Comment Backup Operators can override security restrictions for the sole purpose of backing up or restoring files

[Cryptographic Operators]

Local Group Properties:
Comment Members are authorized to perform cryptographic operations.

[Distributed COM Users]

Local Group Properties:
Comment Members are allowed to launch, activate and use Distributed COM objects on this machine.

[Event Log Readers]

Local Group Properties:
Comment Members of this group can read event logs from local machine

[Guests]

Local Group Properties:
Comment Guests have the same access as members of the Users group by default, except for the Guest account which is further restricted

Group Members:
Guest

[Hyper-V Administrators]

Local Group Properties:
Comment Members of this group have complete and unrestricted access to all features of Hyper-V.

[IIS_IUSRS]

Local Group Properties:
Comment Built-in group used by Internet Information Services.

Group Members:
IUSR

[Network Configuration Operators]

Local Group Properties:

Comment	Members in this group can have some administrative privileges to manage configuration of networking features

[Performance Log Users]

Local Group Properties:

Comment	Members of this group may schedule logging of performance counters, enable trace providers, and collect event traces both locally and via remote access to this computer

[Performance Monitor Users]

Local Group Properties:

Comment	Members of this group can access performance counter data locally and remotely

[Power Users]

Local Group Properties:

Comment	Power Users are included for backwards compatibility and possess limited administrative powers

[Remote Desktop Users]

Local Group Properties:

Comment	Members in this group are granted the right to logon remotely

[Remote Management Users]

Local Group Properties:

Comment	Members of this group can access WMI resources over management protocols (such as WS-Management via the Windows Remote Management service). This applies only to WMI namespaces that grant access to the user.

[Replicator]

Local Group Properties:

Comment	Supports file replication in a domain

[Users]

Local Group Properties:

Comment	Users are prevented from making accidental or intentional system-wide changes and can run most applications

Group Members:

Authenticated Users
INTERACTIVE

[WinRMRemoteWMIUsers__]

Local Group Properties:

Comment	Members of this group can access WMI resources over management protocols (such as WS-Management via the Windows Remote Management service). This applies only to WMI namespaces that grant access to the user.

PCI / AGP Video

Device Description	Device Type
Intel HD Graphics 4000	Video Adapter
Intel HD Graphics 4000	3D Accelerator

GPU

[Integrated: Intel Ivy Bridge-MB - Integrated Graphics Controller (MB GT2)]

Graphics Processor Properties:

Video Adapter	Intel Ivy Bridge-MB - Integrated Graphics Controller (MB GT2)
BIOS Version	Build Number: 2137 PC 14.34 03/14/2012 20:10:50
BIOS Date	3/14/2012
GPU Code Name	Ivy Bridge-MB GT2
PCI Device	8086-0166 / 1025-0649 (Rev 09)
Process Technology	22 nm
Bus Type	Integrated
GPU Clock	349 MHz (original: 649 MHz)
GPU Clock (Turbo)	349 - 1247 MHz
RAMDAC Clock	350 MHz
Pixel Pipelines	4
TMU Per Pipeline	1
Unified Shaders	64 (v5.0)
DirectX Hardware Support	DirectX v11.1
WDDM Version	WDDM 1.3

Architecture:

Architecture	Intel Gen7
Execution Units (EU)	16
L1 Instruction Cache	32 KB
L1 Texture Cache	4 KB
L2 Texture Cache	24 KB
L3 Cache	256 KB
Unified Return Buffer	256 KB

Theoretical Peak Performance:

Pixel Fillrate	1396 MPixel/s @ 349 MHz
Texel Fillrate	1396 MTexel/s @ 349 MHz
Single-Precision FLOPS	89.3 GFLOPS @ 349 MHz

Utilization:

Dedicated Memory	13 MB
Dynamic Memory	51 MB

Graphics Processor Manufacturer:

Company Name	Intel Corporation
Product Information	http://www.intel.com/products/chipsets
Driver Download	http://support.intel.com/support/graphics
Driver Update	http://www.aida64.com/driver-updates

Monitor

[AU Optronics B156XW02 V6]

Monitor Properties:

Monitor Name	AU Optronics B156XW02 V6
Monitor ID	AUO26EC
Manufacturer	AUO
Model	B156XW02 V6
Monitor Type	15.6" LCD (WXGA)
Manufacture Date	Week 1 / 2009
Serial Number	None
Max. Visible Display Size	344 mm x 193 mm (15.5")
Picture Aspect Ratio	16:9
Horizontal Frequency	30 - 83 kHz
Vertical Frequency	56 - 75 Hz
Maximum Resolution	1366 x 768
Gamma	2.20
DPMS Mode Support	None

Supported Video Modes:

1366 x 768	Pixel Clock: 71.80 MHz

Monitor Manufacturer:

Company Name	AU Optronics Corp.
Product Information	http://www.auo.com/?sn=149&lang=en-US&c=33
Driver Download	http://www.auo.com/?sn=171&lang=en-US
Driver Update	http://www.aida64.com/driver-updates

Desktop

Desktop Properties:

Device Technology	Raster Display
Resolution	1366 x 768
Color Depth	32-bit
Color Planes	1
Font Resolution	96 dpi
Pixel Width / Height	36 / 36
Pixel Diagonal	51
Vertical Refresh Rate	60 Hz

Desktop Effects:

Combo-Box Animation	Disabled
Drop Shadow Effect	Disabled
Flat Menu Effect	Enabled
Font Smoothing	Enabled
ClearType	Enabled
Full Window Dragging	Disabled
Gradient Window Title Bars	Enabled
Hide Menu Access Keys	Enabled
Hot Tracking Effect	Enabled
Icon Title Wrapping	Enabled
List-Box Smooth Scrolling	Disabled
Menu Animation	Disabled
Menu Fade Effect	Enabled
Minimize/Restore Animation	Disabled
Mouse Cursor Shadow	Disabled

Selection Fade Effect	Disabled
ShowSounds Accessibility Feature	Disabled
ToolTip Animation	Disabled
ToolTip Fade Effect	Enabled
Windows Aero	Enabled
Windows Plus! Extension	Disabled

Driver Update	http://www.aida64.com/driver-updates

GPGPU

[Direct3D: Intel(R) HD Graphics 4000 (IVB-MB GT2)]

Device Properties:

Device Name	Intel(R) HD Graphics 4000
GPU Code Name	IVB-MB GT2
PCI Device	8086-0166 / 1025-0649 (Rev 09)
Dedicated Memory	32 MB
Driver Name	igdumdim32.dll
Driver Version	10.18.10.3958
Shader Model	SM 5.0
Max Threads	1024
Multiple UAV Access	8 UAVs
Thread Dispatch	3D
Thread Local Storage	32 KB

Device Features:

10-bit Precision Floating-Point	Not Supported
16-bit Precision Floating-Point	Not Supported
Append/Consume Buffers	Supported
Atomic Operations	Supported
Double-Precision Floating-Point	Supported
Gather4	Supported
Indirect Compute Dispatch	Supported
Map On Default Buffers	Supported

Device Manufacturer:

Company Name	Intel Corporation
Product Information	http://www.intel.com/products/chipsets
Driver Download	http://support.intel.com/support/graphics

Driver Update	http://www.aida64.com/driver-updates

[OpenCL: Intel(R) Core(TM) i7-3520M CPU @ 2.90GHz]

OpenCL Properties:

Platform Name	Intel(R) OpenCL
Platform Vendor	Intel(R) Corporation
Platform Version	OpenCL 1.2
Platform Profile	Full

Device Properties:

Device Name	Intel(R) Core(TM) i7-3520M CPU @ 2.90GHz
Device Type	CPU
Device Vendor	Intel(R) Corporation
Device Version	OpenCL 1.2 (Build 76413)
Device Profile	Full
Driver Version	3.0.1.10878
OpenCL C Version	OpenCL C 1.2
Clock Rate	2899 MHz
Compute Units	4
Address Space Size	32-bit
Max 2D Image Size	16384 x 16384
Max 3D Image Size	2048 x 2048 x 2048
Max Image Array Size	2048
Max Image Buffer Size	33552384
Max Samplers	480
Max Work-Item Size	1024 x 1024 x 1024
Max Work-Group Size	1024
Max Argument Size	3840 bytes
Max Constant Buffer Size	128 KB
Max Constant Arguments	480
Max Printf Buffer Size	1 MB
Native ISA Vector Widths	char16, short8, int2, float8, double4
Preferred Native Vector Widths	char1, short1, int1, long1, float1, double1
Profiling Timer Resolution	353 ns
OpenCL DLL	opencl.dll (1.2.11.0)

Memory Properties:

Global Memory	2047 MB
Global Memory Cache	256 KB (Read/Write, 64-byte line)
Local Memory	32 KB
Max Memory Object Allocation Size	524256 KB
Memory Base Address Alignment	1024-bit
Min Data Type Alignment	128 bytes

OpenCL Compliancy:

OpenCL 1.1	Yes (100%)
OpenCL 1.2	Yes (100%)
OpenCL 2.0	No (62%)

Device Features:

Command-Queue Out Of Order Execution	Enabled
Command-Queue Profiling	Enabled
Compiler Available	Yes

Error Correction	Not Supported
Images	Supported
Kernel Execution	Supported
Linker Available	Yes
Little-Endian Device	Yes
Native Kernel Execution	Supported
SVM Atomics	Not Supported
SVM Coarse Grain Buffer	Not Supported
SVM Fine Grain Buffer	Not Supported
SVM Fine Grain System	Not Supported
Thread Trace	Not Supported
Unified Memory	Yes

Half-Precision Floating-Point Capabilities:

Correctly Rounded Divide and Sqrt	Not Supported
Denorms	Not Supported
IEEE754-2008 FMA	Not Supported
INF and NaNs	Not Supported
Rounding to Infinity	Not Supported
Rounding to Nearest Even	Not Supported
Rounding to Zero	Not Supported
Software Basic Floating-Point Operations	No

Single-Precision Floating-Point Capabilities:

Correctly Rounded Divide and Sqrt	Not Supported
Denorms	Supported
IEEE754-2008 FMA	Not Supported
INF and NaNs	Supported
Rounding to Infinity	Not Supported
Rounding to Nearest Even	Supported
Rounding to Zero	Not Supported
Software Basic Floating-Point Operations	No

Double-Precision Floating-Point Capabilities:

Correctly Rounded Divide and Sqrt	Not Supported
Denorms	Supported
IEEE754-2008 FMA	Supported
INF and NaNs	Supported
Rounding to Infinity	Supported
Rounding to Nearest Even	Supported
Rounding to Zero	Supported

Audio Codecs

[Fraunhofer IIS MPEG Layer-3 Codec (decode only)]

ACM Driver Properties:

Driver Description	Fraunhofer IIS MPEG Layer-3 Codec (decode only)
Copyright Notice	Copyright © 1996-1999 Fraunhofer Institut Integrierte Schaltungen IIS
Driver Features	decoder only version
Driver Version	1.09

[Microsoft ADPCM CODEC]

ACM Driver Properties:

Driver Description	Microsoft ADPCM CODEC
Copyright Notice	Copyright (C) 1992-1996 Microsoft Corporation
Driver Features	Compresses and decompresses Microsoft ADPCM audio data.
Driver Version	4.00

[Microsoft CCITT G.711 A-Law and u-Law CODEC]

ACM Driver Properties:

Driver Description	Microsoft CCITT G.711 A-Law and u-Law CODEC
Copyright Notice	Copyright (c) 1993-1996 Microsoft Corporation
Driver Features	Compresses and decompresses CCITT G.711 A-Law and u-Law audio data.
Driver Version	4.00

[Microsoft GSM 6.10 Audio CODEC]

ACM Driver Properties:

Driver Description	Microsoft GSM 6.10 Audio CODEC
Copyright Notice	Copyright (C) 1993-1996 Microsoft Corporation
Driver Features	Compresses and decompresses audio data conforming to the ETSI-GSM (European Telecommunications Standards Institute-Groupe Special Mobile) recommendation 6.10.
Driver Version	4.00

[Microsoft IMA ADPCM CODEC]

ACM Driver Properties:

Driver Description	Microsoft IMA ADPCM CODEC
Copyright Notice	Copyright (C) 1992-1996 Microsoft Corporation
Driver Features	Compresses and decompresses IMA ADPCM audio data.
Driver Version	4.00

[Microsoft PCM Converter]

ACM Driver Properties:

Driver Description	Microsoft PCM Converter
Copyright Notice	Copyright (C) 1992-1996 Microsoft Corporation
Driver Features	Converts frequency and bits per sample of PCM audio data.
Driver Version	5.00

Video Codecs

Driver	Version	Description
iccvid.dll	1.10.0.11	Cinepak® Codec
iyuv_32.dll	6.3.9600.16384 (winblue_rtm.130821-1623)	Intel Indeo(R) Video YUV Codec
msrle32.dll	6.3.9600.16384 (winblue_rtm.130821-1623)	Microsoft RLE Compressor
msvidc32.dll	6.3.9600.16384 (winblue_rtm.130821-1623)	Microsoft Video 1 Compressor
msyuv.dll	6.3.9600.17415 (winblue_r4.141028-1500)	Microsoft UYVY Video Decompressor
tsbyuv.dll	6.3.9600.17415 (winblue_r4.141028-1500)	Toshiba Video Codec

MCI

[AVIVideo]

MCI Device Properties:

Device	AVIVideo
Name	Video for Windows
Description	Video For Windows MCI driver
Type	Digital Video Device
Driver	mciavi32.dll
Status	Enabled

MCI Device Features:

Compound Device	Yes
File Based Device	Yes
Can Eject	No
Can Play	Yes
Can Play In Reverse	Yes
Can Record	No
Can Save Data	No
Can Freeze Data	No
Can Lock Data	No
Can Stretch Frame	Yes
Can Stretch Input	No
Can Test	Yes
Audio Capable	Yes
Video Capable	Yes
Still Image Capable	No

[CDAudio]

MCI Device Properties:

Device	CDAudio
Name	CD Audio

Description	MCI driver for cdaudio devices
Type	CD Audio Device
Driver	mcicda.dll
Status	Enabled

MCI Device Features:

Compound Device	No
File Based Device	No
Can Eject	Yes
Can Play	Yes
Can Record	No
Can Save Data	No
Audio Capable	Yes
Video Capable	No

[MPEGVideo]

MCI Device Properties:

Device	MPEGVideo
Name	DirectShow
Description	DirectShow MCI Driver
Type	Digital Video Device
Driver	mciqtz32.dll
Status	Enabled

MCI Device Features:

Compound Device	Yes
File Based Device	Yes
Can Eject	No
Can Play	Yes
Can Play In Reverse	No
Can Record	No
Can Save Data	No
Can Freeze Data	No
Can Lock Data	No
Can Stretch Frame	Yes
Can Stretch Input	No
Can Test	Yes
Audio Capable	Yes
Video Capable	Yes
Still Image Capable	No

[Sequencer]

MCI Device Properties:

Device	Sequencer
Name	MIDI Sequencer
Description	MCI driver for MIDI sequencer
Type	Sequencer Device
Driver	mciseq.dll
Status	Enabled

MCI Device Features:

Compound Device	Yes
File Based Device	Yes
Can Eject	No
Can Play	Yes
Can Record	No
Can Save Data	No
Audio Capable	Yes
Video Capable	No

[WaveAudio]

MCI Device Properties:

Device	WaveAudio
Name	Sound
Description	MCI driver for waveform audio
Type	Waveform Audio Device
Driver	mciwave.dll
Status	Enabled

MCI Device Features:

Compound Device	Yes
File Based Device	Yes
Can Eject	No
Can Play	Yes
Can Record	Yes
Can Save Data	Yes
Audio Capable	Yes
Video Capable	No

[OCZ-AGILITY4 (OCZ-3C9Y4Q3483TV35R2)]

ATA Device Properties:

Model ID	OCZ-AGILITY4
Serial Number	OCZ-3C9Y4Q3483TV35R2
Revision	1.5.2
World Wide Name	5-E83A97-10A59EBF3
Device Type	SATA-III
Parameters	992277 cylinders, 16 heads, 63 sectors per track, 512 bytes per sector
LBA Sectors	1000215216
Physical / Logical Sector Size	512 bytes / 512 bytes
Buffer	32767 KB
Multiple Sectors	16
Max. PIO Transfer Mode	PIO 4
Max. MWDMA Transfer Mode	MWDMA 2
Max. UDMA Transfer Mode	UDMA 6
Active UDMA Transfer Mode	UDMA 6
Unformatted Capacity	488386 MB
Rotational Speed	SSD
ATA Standard	ACS-2

ATA Device Features:

48-bit LBA	Supported, Enabled
Automatic Acoustic Management (AAM)	Not Supported
Device Configuration Overlay (DCO)	Not Supported
DMA Setup Auto-Activate	Supported, Enabled
Free-Fall Control	Not Supported
General Purpose Logging (GPL)	Supported, Enabled
Hardware Feature Control	Not Supported
Host Protected Area (HPA)	Supported, Enabled
HPA Security Extensions	Not Supported
Hybrid Information Feature	Not Supported
In-Order Data Delivery	Supported, Enabled
Native Command Queuing (NCQ)	Supported
NCQ Autosense	Not Supported
NCQ Priority Information	Not Supported
NCQ Queue Management Command	Not Supported
NCQ Streaming	Not Supported
Phy Event Counters	Not Supported
Read Look-Ahead	Not Supported
Release Interrupt	Not Supported
Security Mode	Supported, Disabled
Sense Data Reporting (SDR)	Not Supported
Service Interrupt	Not Supported

DirectX Video

[Primary Display Driver]

DirectDraw Device Properties:

DirectDraw Driver Name	display
DirectDraw Driver Description	Primary Display Driver
Hardware Driver	igdumdim32.dll (10.18.10.3958)
Hardware Description	Intel(R) HD Graphics 4000

Direct3D Device Properties:

Rendering Bit Depths	8, 16, 32
Z-Buffer Bit Depths	16, 24, 32
Multisample Anti-Aliasing Modes	MSAA 2x, MSAA 4x, MSAA 8x
Min Texture Size	1 x 1
Max Texture Size	8192 x 8192
Unified Shader Version	5.0
DirectX Hardware Support	DirectX v11.0

Direct3D Device Features:

Additive Texture Blending	Supported
AGP Texturing	Not Supported
Anisotropic Filtering	Supported
Automatic Mipmap Generation	Supported
Bilinear Filtering	Supported
Compute Shader	Supported
Cubic Environment Mapping	Supported
Cubic Filtering	Not Supported
Decal-Alpha Texture Blending	Supported
Decal Texture Blending	Supported
Directional Lights	Supported
DirectX Texture Compression	Not Supported
DirectX Volumetric Texture Compression	Not Supported
Dithering	Supported
Dot3 Texture Blending	Supported
Double-Precision Floating-Point	Supported
Driver Concurrent Creates	Supported
Driver Command Lists	Not Supported
Dynamic Textures	Supported
Edge Anti-Aliasing	Not Supported
Environmental Bump Mapping	Supported

Environmental Bump Mapping + Luminance	Supported
Factor Alpha Blending	Supported
Geometric Hidden-Surface Removal	Not Supported
Geometry Shader	Supported
Guard Band	Supported
Hardware Scene Rasterization	Supported
Hardware Transform & Lighting	Supported
Legacy Depth Bias	Supported
Map On Default Buffers	Supported
Mipmap LOD Bias Adjustments	Supported
Mipmapped Cube Textures	Supported
Mipmapped Volume Textures	Supported
Modulate-Alpha Texture Blending	Supported
Modulate Texture Blending	Supported
Non-Square Textures	Supported
N-Patches	Not Supported
Perspective Texture Correction	Supported
Point Lights	Supported
Point Sampling	Supported
Projective Textures	Supported
Quintic Bezier Curves & B-Splines	Not Supported
Range-Based Fog	Supported
Rectangular & Triangular Patches	Not Supported
Rendering In Windowed Mode	Supported
Runtime Shader Linking	Supported
Scissor Test	Supported
Slope-Scale Based Depth Bias	Supported
Specular Flat Shading	Supported
Specular Gouraud Shading	Supported
Specular Phong Shading	Not Supported
Spherical Mapping	Supported
Spot Lights	Supported
Stencil Buffers	Supported
Sub-Pixel Accuracy	Supported
Subtractive Texture Blending	Supported
Table Fog	Supported
Texture Alpha Blending	Supported
Texture Clamping	Supported
Texture Mirroring	Supported
Texture Transparency	Supported
Texture Wrapping	Supported
Tiled Resources	Not Supported
Triangle Culling	Not Supported
Trilinear Filtering	Supported
Two-Sided Stencil Test	Supported
Vertex Alpha Blending	Supported
Vertex Fog	Supported
Vertex Tweening	Supported
Volume Textures	Supported
W-Based Fog	Supported
W-Buffering	Not Supported
Z-Based Fog	Supported
Z-Bias	Supported
Z-Test	Supported

Supported FourCC Codes:

AI44	Supported
AYUV	Supported
I420	Supported
IA44	Supported
IMC1	Supported
IMC2	Supported
IMC3	Supported
IMC4	Supported
IYUV	Supported
NV11	Supported
NV12	Supported
P208	Supported
UYVY	Supported
VYUY	Supported
YUY2	Supported
YV12	Supported
YVU9	Supported
YVYU	Supported

Video Adapter Manufacturer:

Company Name	Intel Corporation
Product Information	http://www.intel.com/products/chipsets
Driver Download	http://support.intel.com/support/graphics
Driver Update	http://www.aida64.com/driver-updates

DirectX Sound

[Primary Sound Driver]

DirectSound Device Properties:

Device Description	Primary Sound Driver
Driver Module	
Primary Buffers	1
Min / Max Secondary Buffers Sample Rate	100 / 200000 Hz
Primary Buffers Sound Formats	8-bit, 16-bit, Mono, Stereo
Secondary Buffers Sound Formats	8-bit, 16-bit, Mono, Stereo
Total / Free Sound Buffers	1 / 0
Total / Free Static Sound Buffers	1 / 0
Total / Free Streaming Sound Buffers	1 / 0
Total / Free 3D Sound Buffers	0 / 0
Total / Free 3D Static Sound Buffers	0 / 0
Total / Free 3D Streaming Sound Buffers	0 / 0

DirectSound Device Features:

Certified Driver	No
Emulated Device	No
Precise Sample Rate	Supported
DirectSound3D	Not Supported
Creative EAX 1.0	Not Supported

Creative EAX 2.0	Not Supported
Creative EAX 3.0	Not Supported
Creative EAX 4.0	Not Supported
Creative EAX 5.0	Not Supported
I3DL2	Not Supported
Sensaura ZoomFX	Not Supported

[Speakers (2- High Definition Audio Device)]

DirectSound Device Properties:

Device Description	Speakers (2- High Definition Audio Device)
Driver Module	{0.0.0.00000000}.{819410b2-d1eb-4014-ac4c-31359644fbb5}
Primary Buffers	1
Min / Max Secondary Buffers Sample Rate	100 / 200000 Hz
Primary Buffers Sound Formats	8-bit, 16-bit, Mono, Stereo
Secondary Buffers Sound Formats	8-bit, 16-bit, Mono, Stereo
Total / Free Sound Buffers	1 / 0
Total / Free Static Sound Buffers	1 / 0
Total / Free Streaming Sound Buffers	1 / 0
Total / Free 3D Sound Buffers	0 / 0
Total / Free 3D Static Sound Buffers	0 / 0
Total / Free 3D Streaming Sound Buffers	0 / 0

DirectSound Device Features:

Certified Driver	No
Emulated Device	No
Precise Sample Rate	Supported
DirectSound3D	Not Supported
Creative EAX 1.0	Not Supported

Device Resources:

IRQ	65536
Memory	C0500000-C0501FFF

Network Adapter Manufacturer:

Company Name	Intel Corporation
Product Information	http://www.intel.com/embedded
Driver Download	http://www.intel.com/support/network
Driver Update	http://www.aida64.com/driver-updates

[Network adapters / Microsoft Kernel Debug Network Adapter]

Device Properties:

Driver Description	Microsoft Kernel Debug Network Adapter
Driver Date	6/21/2006
Driver Version	6.3.9600.16384
Driver Provider	Microsoft
INF File	kdnic.inf
Hardware ID	root\kdnic

Device Manufacturer:

Driver Update	http://www.aida64.com/driver-updates

[Network adapters / Microsoft Wi-Fi Direct Virtual Adapter #4]

Device Properties:

Driver Description	Microsoft Wi-Fi Direct Virtual Adapter #4
Driver Date	6/21/2006
Driver Version	6.3.9600.16384
Driver Provider	Microsoft
INF File	netvwifimp.inf
Hardware ID	{5d624f94-8850-40c3-a3fa-a4fd2080baf3}\vwifimp_wfd
Location Information	VWiFi Bus 0

Device Manufacturer:

Driver Update	http://www.aida64.com/driver-updates

[Network Infrastructure Devices / Community]

Device Properties:

Driver Description	Community
Driver Date	5/13/2010
Driver Version	1.0.0.2
Driver Provider	Microsoft
INF File	oem14.inf
Hardware ID	UMB\VEN_0BD5&DEV_0002&REV_01
Location Information	http://192.168.1.1:49152/IGDdevicedesc.xml

[Print queues / Fax]

Device Properties:

Driver Description	Fax
Driver Date	6/21/2006
Driver Version	6.3.9600.16384
Driver Provider	Microsoft
INF File	PrintQueue.inf
Hardware ID	PRINTENUM\microsoftmicrosoft_s7d14

[Print queues / Microsoft XPS Document Writer]

Device Properties:

Driver Description	Microsoft XPS Document Writer
Driver Date	6/21/2006
Driver Version	6.3.9600.16384
Driver Provider	Microsoft
INF File	PrintQueue.inf
Hardware ID	PRINTENUM\{0f4130dd-19c7-7ab6-99a1-980f03b2ee4e}

[Print queues / Root Print Queue]

Device Properties:

Driver Description	Root Print Queue
Driver Date	6/21/2006
Driver Version	6.3.9600.16384
Driver Provider	Microsoft
INF File	PrintQueue.inf
Hardware ID	PRINTENUM\LocalPrintQueue

[Print queues / Send To OneNote 2013]

Device Properties:

Driver Description	Send To OneNote 2013
Driver Date	6/21/2006
Driver Version	6.3.9600.16384
Driver Provider	Microsoft
INF File	PrintQueue.inf
Hardware ID	PRINTENUM\{3ee39114-30b4-45a4-a109-19d4a40fcc22}

[Processors / Intel(R) Core(TM) i7-3520M CPU @ 2.90GHz]

Device Properties:

Driver Description	Intel(R) Core(TM) i7-3520M CPU @ 2.90GHz
Driver Date	4/21/2009
Driver Version	6.3.9600.16384
Driver Provider	Microsoft
INF File	cpu.inf
Hardware ID	ACPI\GenuineIntel_-_Intel64_Family_6_Model_58

Location Information	Internal High Definition Audio Bus

Device Manufacturer:

Driver Update	http://www.aida64.com/driver-updates

[Sound, video and game controllers / HY-525-BT Stereo]

Device Properties:

Driver Description	HY-525-BT Stereo
Driver Date	1/29/2015
Driver Version	6.3.9600.17673
Driver Provider	Microsoft
INF File	wdma_bt.inf
Hardware ID	BTHENUM\{0000110b-0000-1000-8000-00805f9b34fb}_LOCALMFG&000f

Device Manufacturer:

Driver Update	http://www.aida64.com/driver-updates

[Storage controllers / Microsoft Storage Spaces Controller]

Device Properties:

Driver Description	Microsoft Storage Spaces Controller
Driver Date	6/21/2006
Driver Version	6.3.9600.17415
Driver Provider	Microsoft
INF File	spaceport.inf
Hardware ID	Root\Spaceport

Device Manufacturer:

Driver Update	http://www.aida64.com/driver-updates

[Storage volume shadow copies / Generic volume shadow copy]

Device Properties:

Driver Description	Generic volume shadow copy
Driver Date	6/21/2006
Driver Version	6.3.9600.16384
Driver Provider	Microsoft
INF File	volsnap.inf
Hardware ID	STORAGE\VolumeSnapshot

[Storage volume shadow copies / Generic volume shadow copy]

Device Properties:

Driver Description	Generic volume shadow copy
Driver Date	6/21/2006
Driver Version	6.3.9600.16384
Driver Provider	Microsoft
INF File	volsnap.inf
Hardware ID	STORAGE\VolumeSnapshot

[Storage volume shadow copies / Generic volume shadow copy]

Device Properties:

Driver Description	Generic volume shadow copy
Driver Date	6/21/2006
Driver Version	6.3.9600.16384
Driver Provider	Microsoft
INF File	volsnap.inf
Hardware ID	STORAGE\VolumeSnapshot

[Storage volume shadow copies / Generic volume shadow copy]

Device Properties:

Driver Description	Generic volume shadow copy
Driver Date	6/21/2006
Driver Version	6.3.9600.16384
Driver Provider	Microsoft
INF File	volsnap.inf
Hardware ID	STORAGE\VolumeSnapshot

[Storage volumes / Generic volume]

Device Properties:

Driver Description	Generic volume
Driver Date	6/21/2006
Driver Version	6.3.9600.17215
Driver Provider	Microsoft
INF File	volume.inf
Hardware ID	STORAGE\Volume

[Storage volumes / Generic volume]

Device Properties:

Driver Description	Generic volume
Driver Date	6/21/2006
Driver Version	6.3.9600.17215
Driver Provider	Microsoft
INF File	volume.inf
Hardware ID	STORAGE\Volume

[System devices / 3rd Gen Core processor DRAM Controller - 0154]

Device Properties:

Driver Description	3rd Gen Core processor DRAM Controller - 0154
Driver Date	6/21/2006
Driver Version	6.3.9600.17238
Driver Provider	Microsoft
INF File	machine.inf
Hardware ID	PCI\VEN_8086&DEV_0154&SUBSYS_06491025&REV_09
Location Information	PCI bus 0, device 0, function 0
PCI Device	Intel Ivy Bridge-MB - Host Bridge/DRAM Controller

[System devices / ACPI Fixed Feature Button]

Device Properties:

Driver Description	ACPI Fixed Feature Button
Driver Date	6/21/2006
Driver Version	6.3.9600.17238
Driver Provider	Microsoft
INF File	machine.inf
Hardware ID	ACPI\FixedButton

[System devices / ACPI Lid]

Device Properties:

Driver Description	ACPI Lid
Driver Date	6/21/2006
Driver Version	6.3.9600.17238
Driver Provider	Microsoft
INF File	machine.inf
Hardware ID	ACPI\VEN_PNP&DEV_0C0D

[System devices / ACPI Power Button]

Device Properties:

Driver Description	ACPI Power Button
Driver Date	6/21/2006
Driver Version	6.3.9600.17238
Driver Provider	Microsoft
INF File	machine.inf
Hardware ID	ACPI\VEN_PNP&DEV_0C0C

[System devices / ACPI Sleep Button]

Device Properties:

Driver Description	ACPI Sleep Button
Driver Date	6/21/2006
Driver Version	6.3.9600.17238
Driver Provider	Microsoft
INF File	machine.inf
Hardware ID	ACPI\VEN_PNP&DEV_0C0E

[System devices / Broadcom Memory Stick]

Device Properties:

Driver Description	Broadcom Memory Stick
Driver Date	7/23/2013
Driver Version	1.0.8.0
Driver Provider	Broadcom Corporation
INF File	oem11.inf
Hardware ID	PCI\VEN_14E4&DEV_16BE&SUBSYS_06471025&REV_10
Location Information	PCI bus 2, device 0, function 2
PCI Device	Broadcom Memory Stick Card Reader

Device Resources:

IRQ	17
Memory	C0410000-C041FFFF

[System devices / Broadcom SD Host Controller]

Device Properties:

Driver Description	Broadcom SD Host Controller
Driver Date	7/19/2013
Driver Version	1.0.0.254
Driver Provider	Broadcom Corporation
INF File	oem12.inf
Hardware ID	PCI\VEN_14E4&DEV_16BC&SUBSYS_06471025&REV_10
Location Information	PCI bus 2, device 0, function 1
PCI Device	Broadcom SD Card Reader

Device Resources:

IRQ	17
Memory	C0400000-C040FFFF

[System devices / Composite Bus Enumerator]

Device Properties:

Driver Description	Composite Bus Enumerator
Driver Date	6/21/2006
Driver Version	6.3.9600.16384
Driver Provider	Microsoft
INF File	CompositeBus.inf
Hardware ID	ROOT\CompositeBus

[System devices / Direct memory access controller]

Device Properties:

Driver Description	Direct memory access controller
Driver Date	6/21/2006
Driver Version	6.3.9600.17238
Driver Provider	Microsoft
INF File	machine.inf
Hardware ID	ACPI\VEN_PNP&DEV_0200

[System devices / High Definition Audio Controller]

Device Properties:

Driver Description	High Definition Audio Controller
Driver Date	7/23/2014
Driver Version	6.3.9600.17238
Driver Provider	Microsoft
INF File	hdaudbus.inf
Hardware ID	PCI\VEN_8086&DEV_1E20&SUBSYS_06491025&REV_04
Location Information	PCI bus 0, device 27, function 0
PCI Device	Intel Panther Point PCH - High Definition Audio Controller [C-1]

Device Resources:

IRQ	22
Memory	C0600000-C0603FFF

[System devices / High precision event timer]

Device Properties:

Driver Description	High precision event timer
Driver Date	6/21/2006
Driver Version	6.3.9600.17238
Driver Provider	Microsoft
INF File	machine.inf
Hardware ID	ACPI\VEN_PNP&DEV_0103

[System devices / Intel(R) 7 Series/C216 Chipset Family PCI Express Root Port 1 - 1E10]

Device Properties:

Driver Description	Intel(R) 7 Series/C216 Chipset Family PCI Express Root Port 1 - 1E10
Driver Date	7/25/2013
Driver Version	9.3.0.1029
Driver Provider	Intel
INF File	oem8.inf
Hardware ID	PCI\VEN_8086&DEV_1E10&SUBSYS_06491025&REV_C4

Location Information	PCI bus 0, device 28, function 0
PCI Device	Intel Panther Point PCH - PCI Express Port 1

Device Resources:

IRQ	17
Memory	C0400000-C04FFFFF

Chipset Manufacturer:

Company Name	Intel Corporation

PCI Devices

[Broadcom Memory Stick Card Reader]

Device Properties:

Device Description	Broadcom Memory Stick Card Reader
Bus Type	PCI Express 2.0 x1
Bus / Device / Function	2 / 0 / 2
Device ID	14E4-16BE
Subsystem ID	1025-0647
Device Class	0880 (Base System Peripheral)
Revision	10
Fast Back-to-Back Transactions	Not Supported

Device Features:

66 MHz Operation	Not Supported
Bus Mastering	Enabled

[Broadcom NetLink BCM57785 PCI-E Gigabit Ethernet Controller]

Device Properties:

Device Description	Broadcom NetLink BCM57785 PCI-E Gigabit Ethernet Controller
Bus Type	PCI Express 2.0 x1
Bus / Device / Function	2 / 0 / 0
Device ID	14E4-16B5
Subsystem ID	1025-0647
Device Class	0200 (Ethernet Controller)
Revision	10
Fast Back-to-Back Transactions	Not Supported

Device Features:

66 MHz Operation	Not Supported
Bus Mastering	Enabled

Network Adapter Manufacturer:

Company Name	Broadcom Corporation
Product Information	http://www.broadcom.com/products
Driver Download	http://www.broadcom.com/support/ethernet_nic
Driver Update	http://www.aida64.com/driver-updates

[Broadcom SD Card Reader]

Device Properties:

Device Description	Broadcom SD Card Reader

Bus Type	PCI Express 2.0 x1
Bus / Device / Function	2 / 0 / 1
Device ID	14E4-16BC
Subsystem ID	1025-0647
Device Class	0805 (SD Host Controller)
Revision	10
Fast Back-to-Back Transactions	Not Supported

Device Features:

66 MHz Operation	Not Supported
Bus Mastering	Enabled

[Broadcom xD Card Reader]

Device Properties:

Device Description	Broadcom xD Card Reader
Bus Type	PCI Express 2.0 x1
Bus / Device / Function	2 / 0 / 3
Device ID	14E4-16BF
Subsystem ID	1025-0647
Device Class	0880 (Base System Peripheral)
Revision	10
Fast Back-to-Back Transactions	Not Supported

Device Features:

66 MHz Operation	Not Supported
Bus Mastering	Enabled

[Intel Dual Band Wireless-AC 7260 AC 2x2 HMC WiFi Adapter]

Device Properties:

Device Description	Intel Dual Band Wireless-AC 7260 AC 2x2 HMC WiFi Adapter
Bus Type	PCI Express 2.0 x1
Bus / Device / Function	3 / 0 / 0
Device ID	8086-08B1
Subsystem ID	8086-4070
Device Class	0280 (Network Controller)
Revision	BB
Fast Back-to-Back Transactions	Not Supported

Device Features:

66 MHz Operation	Not Supported
Bus Mastering	Enabled

[Intel HM70 Chipset - LPC Interface Controller [C-1]]

Device Properties:

Device Description	Intel HM70 Chipset - LPC Interface Controller [C-1]
Bus Type	PCI
Bus / Device / Function	0 / 31 / 0
Device ID	8086-1E5E
Subsystem ID	1025-0649
Device Class	0601 (PCI/ISA Bridge)

Revision	04
Fast Back-to-Back Transactions	Not Supported

Device Features:

66 MHz Operation	Not Supported
Bus Mastering	Enabled

[Intel Ivy Bridge-MB - Host Bridge/DRAM Controller]

Device Properties:

Device Description	Intel Ivy Bridge-MB - Host Bridge/DRAM Controller
Bus Type	PCI
Bus / Device / Function	0 / 0 / 0
Device ID	8086-0154
Subsystem ID	1025-0649
Device Class	0600 (Host/PCI Bridge)
Revision	09
Fast Back-to-Back Transactions	Supported, Disabled

Device Features:

66 MHz Operation	Not Supported
Bus Mastering	Enabled

[Intel Ivy Bridge-MB - Integrated Graphics Controller (MB GT2)]

Device Properties:

Device Description	Intel Ivy Bridge-MB - Integrated Graphics Controller (MB GT2)
Bus Type	PCI
Bus / Device / Function	0 / 2 / 0
Device ID	8086-0166
Subsystem ID	1025-0649
Device Class	0300 (VGA Display Controller)
Revision	09
Fast Back-to-Back Transactions	Supported, Disabled

Device Features:

66 MHz Operation	Not Supported
Bus Mastering	Enabled

Video Adapter Manufacturer:

Company Name	Intel Corporation
Product Information	http://www.intel.com/products/chipsets
Driver Download	http://support.intel.com/support/graphics
Driver Update	http://www.aida64.com/driver-updates

[Intel Panther Point PCH - High Definition Audio Controller [C-1]]

Device Properties:

Device Description	Intel Panther Point PCH - High Definition Audio Controller [C-1]
Bus Type	PCI Express 1.0
Bus / Device / Function	0 / 27 / 0
Device ID	8086-1E20
Subsystem ID	1025-0649

Device Class	0403 (High Definition Audio)
Revision	04
Fast Back-to-Back Transactions	Not Supported

Device Features:

66 MHz Operation	Not Supported
Bus Mastering	Enabled

[Intel Panther Point PCH - PCI Express Port 1]

Device Properties:

Device Description	Intel Panther Point PCH - PCI Express Port 1
Bus Type	PCI
Bus / Device / Function	0 / 28 / 0
Device ID	8086-1E10
Subsystem ID	0000-0000
Device Class	0604 (PCI/PCI Bridge)
Revision	C4
Fast Back-to-Back Transactions	Not Supported

Device Features:

66 MHz Operation	Not Supported
Bus Mastering	Enabled

[Intel Panther Point PCH - PCI Express Port 2]

Device Properties:

Device Description	Intel Panther Point PCH - PCI Express Port 2
Bus Type	PCI
Bus / Device / Function	0 / 28 / 1
Device ID	8086-1E12
Subsystem ID	0000-0000
Device Class	0604 (PCI/PCI Bridge)
Revision	C4
Fast Back-to-Back Transactions	Not Supported

Device Features:

66 MHz Operation	Not Supported
Bus Mastering	Enabled

[Intel Panther Point PCH - SMBus Controller [C-1]]

Device Properties:

Device Description	Intel Panther Point PCH - SMBus Controller [C-1]
Bus Type	PCI
Bus / Device / Function	0 / 31 / 3
Device ID	8086-1E22
Subsystem ID	1025-0649
Device Class	0C05 (SMBus Controller)
Revision	04
Fast Back-to-Back Transactions	Supported, Disabled

Device Features:

66 MHz Operation	Not Supported
Bus Mastering	Disabled

[Intel Panther Point PCH - Thermal Management Controller [C-1]]

Device Properties:

Device Description	Intel Panther Point PCH - Thermal Management Controller [C-1]
Bus Type	PCI
Bus / Device / Function	0 / 31 / 6
Device ID	8086-1E24
Subsystem ID	1025-0649
Device Class	1180 (Data Acquisition / Signal Processing Controller)
Revision	04
Fast Back-to-Back Transactions	Not Supported

Device Features:

66 MHz Operation	Not Supported
Bus Mastering	Disabled

[Intel Panther Point PCH - USB 2.0 EHCI Controller #1 [C-1]]

Device Properties:

Device Description	Intel Panther Point PCH - USB 2.0 EHCI Controller #1 [C-1]
Bus Type	PCI
Bus / Device / Function	0 / 29 / 0
Device ID	8086-1E26
Subsystem ID	1025-0649
Device Class	0C03 (USB Controller)
Revision	04
Fast Back-to-Back Transactions	Supported, Disabled

Device Features:

66 MHz Operation	Not Supported
Bus Mastering	Enabled

[Intel Panther Point PCH - USB 2.0 EHCI Controller #2 [C-1]]

Device Properties:

Device Description	Intel Panther Point PCH - USB 2.0 EHCI Controller #2 [C-1]
Bus Type	PCI
Bus / Device / Function	0 / 26 / 0
Device ID	8086-1E2D
Subsystem ID	1025-0649
Device Class	0C03 (USB Controller)
Revision	04
Fast Back-to-Back Transactions	Supported, Disabled

Device Features:

66 MHz Operation	Not Supported
Bus Mastering	Enabled

[Intel Panther Point-M PCH - SATA AHCI Controller [C-1]]

Device Properties:

Device Description	Intel Panther Point-M PCH - SATA AHCI Controller [C-1]
Bus Type	PCI
Bus / Device / Function	0 / 31 / 2
Device ID	8086-1E03
Subsystem ID	1025-0649
Device Class	0106 (SATA Controller)
Revision	04
Fast Back-to-Back Transactions	Supported, Disabled

Device Features:

66 MHz Operation	Supported
Bus Mastering	Enabled

USB Devices

[Generic USB Hub]

Device Properties:

Device Description	Generic USB Hub
Device ID	8087-0024
Device Class	09 / 00 (Hi-Speed Hub with single TT)
Device Protocol	01
Supported USB Version	2.00
Current Speed	High (USB 2.0)

[USB Composite Device]

Device Properties:

Device Description	USB Composite Device
Device ID	1BCF-2C18
Device Class	EF / 02 (Interface Association Descriptor)
Device Protocol	01
Supported USB Version	2.00
Current Speed	High (USB 2.0)

[Generic USB Hub]

Device Properties:

Device Description	Generic USB Hub
Device ID	8087-0024
Device Class	09 / 00 (Hi-Speed Hub with single TT)
Device Protocol	01
Supported USB Version	2.00
Current Speed	High (USB 2.0)

[Generic Bluetooth Radio (Bluetooth V2.0 Dongle)]

Device Properties:

Device Description	Generic Bluetooth Radio

Device ID	0A12-0001
Device Class	E0 / 01 (Bluetooth)
Device Protocol	01
Manufacturer	Bluetooth v2.0
Product	Bluetooth V2.0 Dongle
Supported USB Version	2.00
Current Speed	Full (USB 1.1)

[USB Input Device (Lenovo Wireless Optical Mouse N3903)]

Device Properties:

Device Description	USB Input Device
Device ID	17EF-6020
Device Class	03 / 01 (Human Interface Device)
Device Protocol	02
Manufacturer	Lenovo 2.4G Wireless
Product	Lenovo Wireless Optical Mouse N3903
Supported USB Version	2.00
Current Speed	Full (USB 1.1)

Input

[Standard PS/2 Keyboard]

Keyboard Properties:

Keyboard Name	Standard PS/2 Keyboard
Keyboard Type	Japanese keyboard
Keyboard Layout	US
ANSI Code Page	1252 - Western European (Windows)
OEM Code Page	437
Repeat Delay	1
Repeat Rate	31

[HID-compliant mouse]

Mouse Properties:

Mouse Name	HID-compliant mouse
Mouse Buttons	8
Mouse Hand	Right
Pointer Speed	1
Double-Click Time	550 msec
X/Y Threshold	6 / 10
Wheel Scroll Lines	3

Mouse Features:

Active Window Tracking	Disabled
ClickLock	Disabled
Hide Pointer While Typing	Enabled
Mouse Wheel	Present
Move Pointer To Default Button	Disabled
Pointer Trails	Disabled
Sonar	Disabled

Printers

[Fax]

Printer Properties:

Printer Name	Fax
Default Printer	No
Share Point	Not shared
Printer Port	SHRFAX:
Printer Driver	Microsoft Shared Fax Driver (v4.00)
Device Name	Fax
Print Processor	winprint
Separator Page	None
Availability	Always
Priority	1
Print Jobs Queued	0
Status	Unknown

Paper Properties:

Paper Size	Letter, 8.5 x 11 in
Orientation	Portrait
Print Quality	200 x 200 dpi Mono

[Microsoft XPS Document Writer]

Printer Properties:

Printer Name	Microsoft XPS Document Writer
Default Printer	No
Share Point	Not shared
Printer Port	PORTPROMPT:
Printer Driver	Microsoft XPS Document Writer v4 (v6.03)
Device Name	Microsoft XPS Document Writer
Print Processor	winprint

Print Quality	600 x 600 dpi Color

Auto Start

Application Description	Start From	Application Command
BTMTrayAgent	Registry\Common\Run	rundll32.exe C:\Program Files (x86)\Intel\Bluetooth\btmshellex.dll",TrayApp
Send to OneNote	StartMenu\User	C:\Program Files (x86)\Microsoft Office\Office15\ONENOTEM.EXE /tsr

Scheduled

[Microsoft Office 15 Sync Maintenance for LTRANPHD-Liem LTranPHD]

Task Properties:

Task Name	Microsoft Office 15 Sync Maintenance for LTRANPHD-Liem LTranPHD
Status	Enabled
Application Name	C:\Program Files\Microsoft Office\Office15\MsoSync.exe
Application Parameters	
Working Folder	
Comment	Lightweight task keeps Microsoft Office Document Cache in good shape. Disabling this task may lead to unexpected issues when working with documents from online sources as well as higher disk usage.
Account Name	LTRANPHD\Liem
Creator	Microsoft Office
Last Run	3/22/2015 3:29:18 PM
Next Run	Unknown

Task Triggers:

At log on	At log on of LTRANPHD\Liem
On idle	When computer is idle
One time	At 02:16:24Z on 4/23/2015

[Optimize Start Menu Cache Files-S-1-5-21-1888849264-3803429180-4108621888-1001]

Task Properties:

Task Name	Optimize Start Menu Cache Files-S-1-5-21-1888849264-3803429180-4108621888-1001
Status	Disabled
Application Name	
Application Parameters	
Working Folder	
Comment	This idle task reorganizes the cache files used to display the start menu. It is enabled only when the cache files are not optimally organized.
Account Name	Liem
Creator	Microsoft Corporation
Last Run	4/27/2015 6:02:00 PM

Next Run	Unknown

Task Triggers:

On idle	When computer is idle

Windows Security

Operating System Properties:

OS Name	Microsoft Windows 8.1 Professional
OS Service Pack	-
Winlogon Shell	explorer.exe
User Account Control (UAC)	Enabled
System Restore	Enabled

Data Execution Prevention (DEP, NX, EDB):

Supported by Operating System	Yes
Supported by CPU	Yes
Active (To Protect Applications)	Yes
Active (To Protect Drivers)	Yes

Windows Update

Update Description	Update Type	Inst. Date
(Automatic Update)	Download:Automatic, Install:Scheduled	Every Day 0:00
Cumulative Security Update for Internet Explorer 11 for Windows 8.1 for x64-based Systems (KB3032359)	Update	4/10/2015
Cumulative Security Update for Internet Explorer 11 for Windows 8.1 for x64-based Systems (KB3038314)	Update	4/15/2015
Definition Update for Microsoft Office 2013 (KB2760587) 64-Bit Edition	Update	4/11/2015
Definition Update for Microsoft Office 2013 (KB2956172) 64-Bit Edition	Update	4/11/2015
Definition Update for Microsoft Office 2013 (KB2965273) 64-Bit Edition	Update	4/15/2015
Definition Update for Windows Defender - KB2267602 (Definition 1.195.2640.0)	Update	4/10/2015
Definition Update for Windows Defender - KB2267602 (Definition 1.195.2815.0)	Update	4/11/2015
Definition Update for Windows Defender - KB2267602 (Definition 1.195.2894.0)	Update	4/11/2015
Definition Update for Windows Defender - KB2267602 (Definition 1.195.3018.0)	Update	4/12/2015
Definition Update for Windows Defender - KB2267602 (Definition 1.195.3163.0)	Update	4/13/2015
Definition Update for Windows Defender - KB2267602 (Definition 1.195.3225.0)	Update	4/14/2015
Definition Update for Windows Defender - KB2267602 (Definition 1.195.3437.0)	Update	4/15/2015
Definition Update for Windows Defender - KB2267602 (Definition 1.195.3761.0)	Update	4/19/2015
Definition Update for Windows Defender - KB2267602 (Definition 1.195.3814.0)	Update	4/20/2015
Definition Update for Windows Defender - KB2267602 (Definition 1.197.155.0)	Update	4/21/2015
Definition Update for Windows Defender - KB2267602 (Definition 1.197.280.0)	Update	4/22/2015
Definition Update for Windows Defender - KB2267602 (Definition 1.197.566.0)	Update	4/24/2015
Definition Update for Windows Defender - KB2267602 (Definition 1.197.652.0)	Update	4/25/2015
Definition Update for Windows Defender - KB2267602 (Definition 1.197.652.0)	Update	4/25/2015
Definition Update for Windows Defender - KB2267602 (Definition 1.197.775.0)	Update	4/27/2015
Definition Update for Windows Defender - KB2267602 (Definition 1.197.775.0)	Update	4/27/2015

Definition Update for Windows Defender - KB2267602 (Definition 1.197.874.0)	Update	4/28/2015
Razer - Input - Razer Copperhead USB Mouse	Update	4/10/2015
Security Update for Internet Explorer Flash Player for Windows 8.1 for x64-based Systems (KB3044132)	Update	4/10/2015
Security Update for Internet Explorer Flash Player for Windows 8.1 for x64-based Systems (KB3049508)	Update	4/15/2015
Security Update for Microsoft .NET Framework 3.5 on Windows 8.1 and Windows Server 2012 R2 for x64-based Systems (KB2894852)	Update	4/12/2015
Security Update for Microsoft .NET Framework 3.5 on Windows 8.1 and Windows Server 2012 R2 for x64-based Systems (KB2966826)	Update	4/12/2015
Security Update for Microsoft .NET Framework 3.5 on Windows 8.1 and Windows Server 2012 R2 for x64-based Systems (KB2966828)	Update	4/12/2015
Security Update for Microsoft .NET Framework 3.5 on Windows 8.1 and Windows Server 2012 R2 for x64-based Systems (KB2968296)	Update	4/12/2015
Security Update for Microsoft .NET Framework 3.5 on Windows 8.1 and Windows Server 2012 R2 for x64-based Systems (KB2972103)	Update	4/12/2015
Security Update for Microsoft .NET Framework 3.5 on Windows 8.1 and Windows Server 2012 R2 for x64-based Systems (KB2972213)	Update	4/12/2015
Security Update for Microsoft .NET Framework 3.5 on Windows 8.1 and Windows Server 2012 R2 for x64-based Systems (KB2973114)	Update	4/12/2015
Security Update for Microsoft .NET Framework 3.5 on Windows 8.1 and Windows Server 2012 R2 for x64-based Systems (KB2978122)	Update	4/12/2015
Security Update for Microsoft .NET Framework 3.5 on Windows 8.1 and Windows Server 2012 R2 for x64-based Systems (KB2979573)	Update	4/12/2015
Security Update for Microsoft .NET Framework 3.5 on Windows 8.1 and Windows Server 2012 R2 for x64-based Systems (KB3037576)	Update	4/15/2015
Security Update for Microsoft .NET Framework 4.5.1 and 4.5.2 on Windows 8.1 and Windows Server 2012 R2 x64-based Systems (KB2977765)	Update	4/10/2015
Security Update for Microsoft .NET Framework 4.5.1 and 4.5.2 on Windows 8.1 and Windows Server 2012 R2 x64-based Systems (KB2978041)	Update	4/11/2015
Security Update for Microsoft .NET Framework 4.5.1 and 4.5.2 on Windows 8.1 and Windows Server 2012 R2 x64-based Systems (KB2978126)	Update	4/11/2015
Security Update for Microsoft .NET Framework 4.5.1 and 4.5.2 on Windows 8.1 and Windows Server 2012 R2 x64-based Systems (KB2979576)	Update	4/11/2015
Security Update for Microsoft .NET Framework 4.5.1 and 4.5.2 on Windows 8.1 and Windows Server 2012 R2 x64-based Systems (KB3037579)	Update	4/15/2015
Security Update for Microsoft .NET Framework 4.5.1 on Windows 8.1 and Windows Server 2012 R2 for x64-based Systems (KB2894856)	Update	4/10/2015
Security Update for Microsoft Excel 2013 (KB2920753) 64-Bit Edition	Update	4/11/2015
Security Update for Microsoft Lync 2013 (KB2881013) 64-Bit Edition	Update	4/11/2015
Security Update for Microsoft Office 2013 (KB2768005) 64-Bit Edition	Update	4/11/2015
Security Update for Microsoft Office 2013 (KB2880463) 64-Bit Edition	Update	4/11/2015
Security Update for Microsoft Office 2013 (KB2910941) 64-Bit Edition	Update	4/11/2015
Security Update for Microsoft Office 2013 (KB2956151) 64-Bit Edition	Update	4/11/2015
Security Update for Microsoft Word 2013 (KB2956163) 64-Bit Edition	Update	4/11/2015
Security Update for Microsoft Word 2013 (KB2965224) 64-Bit Edition	Update	4/15/2015
Security Update for Windows 8.1 for x64-based Systems (KB2918614)	Update	4/10/2015
Security Update for Windows 8.1 for x64-based Systems (KB2920189)	Update	4/11/2015
Security Update for Windows 8.1 for x64-based Systems (KB2961072)	Update	4/11/2015
Security Update for Windows 8.1 for x64-based Systems (KB2962140)	Update	4/10/2015
Security Update for Windows 8.1 for x64-based Systems (KB2964718)	Update	4/10/2015
Security Update for Windows 8.1 for x64-based Systems (KB2971850)	Update	4/10/2015
Security Update for Windows 8.1 for x64-based Systems (KB2972280)	Update	4/10/2015
Security Update for Windows 8.1 for x64-based Systems (KB2973351)	Update	4/11/2015
Security Update for Windows 8.1 for x64-based Systems (KB2977292)	Update	4/10/2015
Security Update for Windows 8.1 for x64-based Systems (KB2988948)	Update	4/10/2015
Security Update for Windows 8.1 for x64-based Systems (KB2993958)	Update	4/10/2015
Security Update for Windows 8.1 for x64-based Systems (KB3004361)	Update	4/11/2015
Security Update for Windows 8.1 for x64-based Systems (KB3004365)	Update	4/10/2015
Security Update for Windows 8.1 for x64-based Systems (KB3006226)	Update	4/10/2015
Security Update for Windows 8.1 for x64-based Systems (KB3010788)	Update	4/10/2015
Security Update for Windows 8.1 for x64-based Systems (KB3011780)	Update	4/10/2015
Security Update for Windows 8.1 for x64-based Systems (KB3019215)	Update	4/10/2015
Security Update for Windows 8.1 for x64-based Systems (KB3019978)	Update	4/11/2015
Security Update for Windows 8.1 for x64-based Systems (KB3021674)	Update	4/11/2015
Security Update for Windows 8.1 for x64-based Systems (KB3022777)	Update	4/10/2015
Security Update for Windows 8.1 for x64-based Systems (KB3023266)	Update	4/10/2015
Security Update for Windows 8.1 for x64-based Systems (KB3023562)	Update	4/11/2015

Security Update for Windows 8.1 for x64-based Systems (KB3030377)	Update	4/10/2015
Security Update for Windows 8.1 for x64-based Systems (KB3032323)	Update	4/11/2015
Security Update for Windows 8.1 for x64-based Systems (KB3033889)	Update	4/10/2015
Security Update for Windows 8.1 for x64-based Systems (KB3034344)	Update	4/11/2015
Security Update for Windows 8.1 for x64-based Systems (KB3035017)	Update	4/10/2015
Security Update for Windows 8.1 for x64-based Systems (KB3035126)	Update	4/10/2015
Security Update for Windows 8.1 for x64-based Systems (KB3035131)	Update	4/10/2015
Security Update for Windows 8.1 for x64-based Systems (KB3035132)	Update	4/10/2015
Security Update for Windows 8.1 for x64-based Systems (KB3039066)	Update	4/10/2015
Security Update for Windows 8.1 for x64-based Systems (KB3042553)	Update	4/15/2015
Security Update for Windows 8.1 for x64-based Systems (KB3045685)	Update	4/15/2015
Security Update for Windows 8.1 for x64-based Systems (KB3045755)	Update	4/15/2015
Security Update for Windows 8.1 for x64-based Systems (KB3045999)	Update	4/15/2015
Security Update for Windows 8.1 for x64-based Systems (KB3046049)	Update	4/11/2015
Service Pack 1 for Microsoft Office 2013 (KB2850036) 64-Bit Edition	Update	4/11/2015
Update for .NET Native on Windows 8.1 and Windows Server 2012 R2 for x64-based Systems (KB2954879)	Update	4/10/2015
Update for Microsoft Access 2013 (KB2956176) 64-Bit Edition	Update	4/11/2015
Update for Microsoft Access 2013 (KB2965276) 64-Bit Edition	Update	4/15/2015
Update for Microsoft Camera Codec Pack for Windows 8.1 for x64-based Systems (KB2899189)	Update	4/10/2015
Update for Microsoft Excel 2013 (KB2956145) 64-Bit Edition	Update	4/11/2015
Update for Microsoft Excel 2013 (KB2965275) 64-Bit Edition	Update	4/15/2015
Update for Microsoft Lync 2013 (KB2881083) 64-Bit Edition	Update	4/11/2015
Update for Microsoft Lync 2013 (KB2889923) 64-Bit Edition	Update	4/20/2015
Update for Microsoft Lync 2013 (KB2956174) 64-Bit Edition	Update	4/11/2015
Update for Microsoft Office 2013 (KB2726996) 64-Bit Edition	Update	4/11/2015
Update for Microsoft Office 2013 (KB2760249) 64-Bit Edition	Update	4/11/2015
Update for Microsoft Office 2013 (KB2760344) 64-Bit Edition	Update	4/11/2015
Update for Microsoft Office 2013 (KB2760371) 64-Bit Edition	Update	4/11/2015
Update for Microsoft Office 2013 (KB2760544) 64-Bit Edition	Update	4/11/2015
Update for Microsoft Office 2013 (KB2760610) 64-Bit Edition	Update	4/11/2015
Update for Microsoft Office 2013 (KB2768012) 64-Bit Edition	Update	4/11/2015
Update for Microsoft Office 2013 (KB2817316) 64-Bit Edition	Update	4/11/2015
Update for Microsoft Office 2013 (KB2825678) 64-Bit Edition	Update	4/15/2015
Update for Microsoft Office 2013 (KB2837654) 64-Bit Edition	Update	4/11/2015
Update for Microsoft Office 2013 (KB2863843) 64-Bit Edition	Update	4/11/2015
Update for Microsoft Office 2013 (KB2880478) 64-Bit Edition	Update	4/11/2015
Update for Microsoft Office 2013 (KB2880487) 64-Bit Edition	Update	4/15/2015
Update for Microsoft Office 2013 (KB2880977) 64-Bit Edition	Update	4/11/2015
Update for Microsoft Office 2013 (KB2881001) 64-Bit Edition	Update	4/11/2015
Update for Microsoft Office 2013 (KB2881035) 64-Bit Edition	Update	4/11/2015
Update for Microsoft Office 2013 (KB2883036) 64-Bit Edition	Update	4/11/2015
Update for Microsoft Office 2013 (KB2883095) 64-Bit Edition	Update	4/11/2015
Update for Microsoft Office 2013 (KB2899498) 64-Bit Edition	Update	4/11/2015
Update for Microsoft Office 2013 (KB2899522) 64-Bit Edition	Update	4/11/2015
Update for Microsoft Office 2013 (KB2920754) 64-Bit Edition	Update	4/11/2015
Update for Microsoft Office 2013 (KB2920769) 64-Bit Edition	Update	4/11/2015
Update for Microsoft Office 2013 (KB2956148) 64-Bit Edition	Update	4/11/2015
Update for Microsoft Office 2013 (KB2956154) 64-Bit Edition	Update	4/11/2015
Update for Microsoft Office 2013 (KB2956160) 64-Bit Edition	Update	4/11/2015
Update for Microsoft Office 2013 (KB2956167) 64-Bit Edition	Update	4/11/2015
Update for Microsoft Office 2013 (KB2956168) 64-Bit Edition	Update	4/11/2015
Update for Microsoft Office 2013 (KB2956169) 64-Bit Edition	Update	4/11/2015
Update for Microsoft Office 2013 (KB2956171) 64-Bit Edition	Update	4/11/2015
Update for Microsoft Office 2013 (KB2956177) 64-Bit Edition	Update	4/11/2015

Update for Microsoft Office 2013 (KB2965218) 64-Bit Edition	Update	4/19/2015
Update for Microsoft Office 2013 (KB2965255) 64-Bit Edition	Update	4/15/2015
Update for Microsoft Office 2013 (KB2965262) 64-Bit Edition	Update	4/15/2015
Update for Microsoft Office 2013 (KB2965267) 64-Bit Edition	Update	4/15/2015
Update for Microsoft Office 2013 (KB2965268) 64-Bit Edition	Update	4/15/2015
Update for Microsoft OneDrive for Business (KB2920746) 64-Bit Edition	Update	4/11/2015
Update for Microsoft OneDrive for Business (KB2956185) 64-Bit Edition	Update	4/15/2015
Update for Microsoft OneNote 2013 (KB2956165) 64-Bit Edition	Update	4/11/2015
Update for Microsoft OneNote 2013 (KB2965264) 64-Bit Edition	Update	4/19/2015
Update for Microsoft Outlook 2013 (KB2956170) 64-Bit Edition	Update	4/11/2015
Update for Microsoft Outlook 2013 (KB2965270) 64-Bit Edition	Update	4/15/2015
Update for Microsoft Outlook Social Connector 2013 (KB2737996) 64-Bit Edition	Update	4/11/2015
Update for Microsoft Outlook Social Connector 2013 (KB2965257) 64-Bit Edition	Update	4/15/2015
Update for Microsoft PowerPoint 2013 (KB2965206) 64-Bit Edition	Update	4/11/2015
Update for Microsoft PowerPoint 2013 (KB2965256) 64-Bit Edition	Update	4/15/2015
Update for Microsoft Project 2013 (KB2956187) 64-Bit Edition	Update	4/11/2015
Update for Microsoft Project 2013 (KB2965279) 64-Bit Edition	Update	4/15/2015
Update for Microsoft Publisher 2013 (KB2883048) 64-Bit Edition	Update	4/11/2015
Update for Microsoft SkyDrive Pro (KB2837652) 64-Bit Edition	Update	4/11/2015
Update for Microsoft Visio 2013 (KB2817306) 64-Bit Edition	Update	4/11/2015
Update for Microsoft Visio Viewer 2013 (KB2817301) 64-Bit Edition	Update	4/11/2015
Update for Microsoft Word 2013 (KB2878319) 64-Bit Edition	Update	4/11/2015
Update for Skype for Business 2015 (KB2889853) 64-Bit Edition	Update	4/15/2015
Update for Windows 8.1 for x64-based Systems (KB2939087)	Update	4/11/2015
Update for Windows 8.1 for x64-based Systems (KB2955164)	Update	4/10/2015
Update for Windows 8.1 for x64-based Systems (KB2958262)	Update	4/10/2015
Update for Windows 8.1 for x64-based Systems (KB2959626)	Update	4/10/2015
Update for Windows 8.1 for x64-based Systems (KB2962409)	Update	4/10/2015
Update for Windows 8.1 for x64-based Systems (KB2965142)	Update	4/10/2015
Update for Windows 8.1 for x64-based Systems (KB2967917)	Update	4/10/2015
Update for Windows 8.1 for x64-based Systems (KB2969817)	Update	4/10/2015
Update for Windows 8.1 for x64-based Systems (KB2971203)	Update	4/10/2015
Update for Windows 8.1 for x64-based Systems (KB2971239)	Update	4/10/2015
Update for Windows 8.1 for x64-based Systems (KB2975719)	Update	4/11/2015
Update for Windows 8.1 for x64-based Systems (KB2984006)	Update	4/10/2015
Update for Windows 8.1 for x64-based Systems (KB2989930)	Update	4/11/2015
Update for Windows 8.1 for x64-based Systems (KB2990967)	Update	4/10/2015
Update for Windows 8.1 for x64-based Systems (KB2994290)	Update	4/11/2015
Update for Windows 8.1 for x64-based Systems (KB2995388)	Update	4/10/2015
Update for Windows 8.1 for x64-based Systems (KB2998174)	Update	4/11/2015
Update for Windows 8.1 for x64-based Systems (KB3000850)	Update	4/15/2015
Update for Windows 8.1 for x64-based Systems (KB3003667)	Update	4/11/2015
Update for Windows 8.1 for x64-based Systems (KB3004394)	Update	4/11/2015
Update for Windows 8.1 for x64-based Systems (KB3006137)	Update	4/11/2015
Update for Windows 8.1 for x64-based Systems (KB3008242)	Update	4/10/2015
Update for Windows 8.1 for x64-based Systems (KB3012199)	Update	4/10/2015
Update for Windows 8.1 for x64-based Systems (KB3012235)	Update	4/11/2015
Update for Windows 8.1 for x64-based Systems (KB3012702)	Update	4/11/2015
Update for Windows 8.1 for x64-based Systems (KB3013172)	Update	4/10/2015
Update for Windows 8.1 for x64-based Systems (KB3013410)	Update	4/10/2015
Update for Windows 8.1 for x64-based Systems (KB3013531)	Update	4/22/2015
Update for Windows 8.1 for x64-based Systems (KB3013538)	Update	4/22/2015
Update for Windows 8.1 for x64-based Systems (KB3013769)	Update	4/22/2015
Update for Windows 8.1 for x64-based Systems (KB3015696)	Update	4/22/2015

Update for Windows 8.1 for x64-based Systems (KB3016074)	Update	4/10/2015
Update for Windows 8.1 for x64-based Systems (KB3018133)	Update	4/10/2015
Update for Windows 8.1 for x64-based Systems (KB3020338)	Update	4/11/2015
Update for Windows 8.1 for x64-based Systems (KB3020370)	Update	4/22/2015
Update for Windows 8.1 for x64-based Systems (KB3022345)	Update	4/22/2015
Update for Windows 8.1 for x64-based Systems (KB3022796)	Update	4/11/2015
Update for Windows 8.1 for x64-based Systems (KB3024751)	Update	4/10/2015
Update for Windows 8.1 for x64-based Systems (KB3024755)	Update	4/11/2015
Update for Windows 8.1 for x64-based Systems (KB3025417)	Update	4/11/2015
Update for Windows 8.1 for x64-based Systems (KB3027209)	Update	4/10/2015
Update for Windows 8.1 for x64-based Systems (KB3029606)	Update	4/10/2015
Update for Windows 8.1 for x64-based Systems (KB3029803)	Update	4/11/2015
Update for Windows 8.1 for x64-based Systems (KB3030947)	Update	4/10/2015
Update for Windows 8.1 for x64-based Systems (KB3033446)	Update	4/22/2015
Update for Windows 8.1 for x64-based Systems (KB3034348)	Update	4/11/2015
Update for Windows 8.1 for x64-based Systems (KB3035527)	Update	4/10/2015
Update for Windows 8.1 for x64-based Systems (KB3035553)	Update	4/10/2015
Update for Windows 8.1 for x64-based Systems (KB3035583)	Update	4/11/2015
Update for Windows 8.1 for x64-based Systems (KB3036228)	Update	4/10/2015
Update for Windows 8.1 for x64-based Systems (KB3036562)	Update	4/11/2015
Update for Windows 8.1 for x64-based Systems (KB3036612)	Update	4/10/2015
Update for Windows 8.1 for x64-based Systems (KB3037924)	Update	4/22/2015
Update for Windows 8.1 for x64-based Systems (KB3038002)	Update	4/22/2015
Update for Windows 8.1 for x64-based Systems (KB3038562)	Update	4/22/2015
Update for Windows 8.1 for x64-based Systems (KB3038701)	Update	4/22/2015

It is generated on the computer that was accessed. The subject fields indicate the account on the local system which requested the logon. This is most commonly a service such as the Server service, or a local process such as Winlogon.exe or Services.exe. The logon type field indicates the kind of logon that occurred. The most common types are 2 (interactive) and 3 (network). The New Logon fields indicate the account for whom the new logon was created, i.e. the account that was logged on. The network fields indicate where a remote logon request originated. Workstation name is not always available and may be left blank in some cases. The impersonation level field indicates the extent to which a process in the logon session can impersonate. The authentication information fields provide detailed information about this specific logon request.

					- Logon GUID is a unique identifier that can be used to correlate this event with a KDC event. - Transited services indicate which intermediate services have participated in this logon request. - Package name indicates which sub-protocol was used among the NTLM protocols. - Key length indicates the length of the generated session key. This will be 0 if no session key was requested.

The impersonation level field indicates the extent to which a process in the logon session can impersonate. The authentication information fields provide detailed information about this specific logon request. - Logon GUID is a unique identifier that can be used to correlate this event with a KDC event. - Transited services indicate which intermediate services have participated in this logon request. - Package name indicates which sub-protocol was used among the NTLM protocols. - Key length indicates the length of the generated session key. This will be 0 if no session key was requested.

Subject: Security ID: S-1-5-18 Account Name: LTRANPHD$ Account Domain: WORKGROUP Logon ID: 0x3e7 Logon Type: 5 Impersonation Level: %%1833 New Logon: Security ID: S-1-5-18 Account Name: SYSTEM Account Domain: NT AUTHORITY Logon ID: 0x3e7 Logon GUID: {00000000-0000-0000-0000-000000000000} Process Information: Process ID: 0x240 Process Name: C:\Windows\System32\services.exe Network Information: Workstation Name: Source Network Address: - Source Port: - Detailed Authentication Information: Logon Process: Advapi Authentication Package: Negotiate Transited Services: - Package Name (NTLM only): - Key Length: 0 This event is generated when a logon session is created. It is generated on the computer that was accessed. The subject fields indicate the account on the local system which requested the logon. This is most commonly a service such as the Server service, or a local process such as Winlogon.exe or Services.exe. The logon type field indicates the kind of logon that occurred. The most common types are 2 (interactive) and 3 (network). The New Logon fields indicate the account for whom the new logon was created, i.e. the account that was logged on. The network fields indicate where a remote logon request originated. Workstation name is not always available and may be left blank in some cases. The impersonation level field indicates the extent to which a process in the logon session can impersonate. The authentication information fields provide detailed information about this specific logon request. - Logon GUID is a unique identifier that can be used to correlate this event with a KDC event. - Transited services indicate which intermediate services have participated in this logon request. - Package name indicates which sub-protocol was used among the NTLM protocols. - Key length indicates the length of the generated session key. This will be 0 if no session key was requested.

The impersonation level field indicates the extent to which a process in the logon session can

					impersonate. The authentication information fields provide detailed information about this specific logon request. - Logon GUID is a unique identifier that can be used to correlate this event with a KDC event. - Transited services indicate which intermediate services have participated in this logon request. - Package name indicates which sub-protocol was used among the NTLM protocols. - Key length indicates the length of the generated session key. This will be 0 if no session key was requested.
Security	Audit Success	12544	2015-04-22 19:05:20	Microsoft-Windows-Security-Auditing	4624: An account was successfully logged on. It is generated on the computer that was accessed. The subject fields indicate the account on the local system which requested the logon. This is most commonly a service such as the Server service, or a local process such as Winlogon.exe or Services.exe. The logon type field indicates the kind of logon that occurred. The most common types are 2 (interactive) and 3 (network). The New Logon fields indicate the account for whom the new logon was created, i.e. the account that was logged on. The network fields indicate where a remote logon request originated. Workstation name is not always available and may be left blank in some cases. The impersonation level field indicates the extent to which a process in the logon session can impersonate. The authentication information fields provide detailed information about this specific logon request. - Logon GUID is a unique identifier that can be used to correlate this event with a KDC event. - Transited services indicate which intermediate services have participated in this logon request. - Package name indicates which sub-protocol was used among the NTLM protocols. - Key length indicates the length of the generated session key. This will be 0 if no session key was requested.

It is generated on the computer that was accessed. The subject fields indicate the account on the local system which requested the logon. This is most commonly a service such as the Server service, or a local process such as Winlogon.exe or Services.exe. The logon type field indicates the kind of logon that occurred. The most common types are 2 (interactive) and 3 (network). The New Logon fields indicate the account for whom the new logon was created, i.e. the account that was logged on. The network fields indicate where a remote logon request originated. Workstation name is not always available and may be left blank in some cases. The impersonation level field indicates the extent to which a process in the logon session can impersonate. The authentication information fields provide detailed information about this specific logon request. - Logon GUID is a unique identifier that can be used to correlate this event with a KDC event. - Transited services indicate which intermediate services have participated in this logon request. - Package name indicates which sub-protocol was used among the NTLM protocols. - Key length indicates the length of the generated session key. This will be 0 if no session key was requested.

It is generated on the computer that was accessed. The subject fields indicate the account on the local system which requested the logon. This is most commonly a service such as the Server service, or a local process such as Winlogon.exe or Services.exe. The logon type field indicates the kind of logon that occurred.

			19:57:57		The most common types are 2 (interactive) and 3 (network). The New Logon fields indicate the account for whom the new logon was created, i.e. the account that was logged on. The network fields indicate where a remote logon request originated. Workstation name is not always available and may be left blank in some cases. The impersonation level field indicates the extent to which a process in the logon session can impersonate. The authentication information fields provide detailed information about this specific logon request. - Logon GUID is a unique identifier that can be used to correlate this event with a KDC event. - Transited services indicate which intermediate services have participated in this logon request. - Package name indicates which sub-protocol was used among the NTLM protocols. - Key length indicates the length of the generated session key. This will be 0 if no session key was requested.

This is most commonly a service such as the Server service, or a local process such as Winlogon.exe or Services.exe. The logon type field indicates the kind of logon that occurred. The most common types are 2 (interactive) and 3 (network). The New Logon fields indicate the account for whom the new logon was created, i.e. the account that was logged on. The network fields indicate where a remote logon request originated. Workstation name is not always available and may be left blank in some cases. The impersonation level field indicates the extent to which a process in the logon session can impersonate. The authentication information fields provide detailed information about this specific logon request. - Logon GUID is a unique identifier that can be used to correlate this event with a KDC event. - Transited services indicate which intermediate services have participated in this logon request. - Package name indicates which sub-protocol was used among the NTLM protocols. - Key length indicates the length of the generated session key. This will be 0 if no session key was requested.

Security	Audit Success	12544	2015-04-22 21:18:09	Microsoft-Windows-Security-Auditing	created. It is generated on the computer that was accessed. The subject fields indicate the account on the local system which requested the logon. This is most commonly a service such as the Server service, or a local process such as Winlogon.exe or Services.exe. The logon type field indicates the kind of logon that occurred. The most common types are 2 (interactive) and 3 (network). The New Logon fields indicate the account for whom the new logon was created, i.e. the account that was logged on. The network fields indicate where a remote logon request originated. Workstation name is not always available and may be left blank in some cases. The impersonation level field indicates the extent to which a process in the logon session can impersonate. The authentication information fields provide detailed information about this specific logon request. - Logon GUID is a unique identifier that can be used to correlate this event with a KDC event. - Transited services indicate which intermediate services have participated in this logon request. - Package name indicates which sub-protocol was used among the NTLM protocols. - Key length indicates the length of the generated session key. This will be 0 if no session key was requested.

Security	Audit Success	12292	2015-04-23 08:53:12	Microsoft-Windows-Security-Auditing	5033: The Windows Firewall Driver started successfully.
Security	Audit Success	12292	2015-04-23 08:53:12	Microsoft-Windows-Security-Auditing	5024: The Windows Firewall service started successfully.
Security	Audit Success	12544	2015-04-23 08:53:12	Microsoft-Windows-Security-Auditing	4624: An account was successfully logged on. Subject: Security ID: S-1-5-18 Account Name: LTRANPHD$ Account Domain: WORKGROUP Logon ID: 0x3e7 Logon Type: 5 Impersonation Level: %%1833 New Logon: Security ID: S-1-5-18 Account Name: SYSTEM Account Domain: NT AUTHORITY Logon ID: 0x3e7 Logon GUID: {00000000-0000-0000-0000-000000000000} Process Information: Process ID: 0x230 Process Name: C:\Windows\System32\services.exe Network Information: Workstation Name: Source Network Address: - Source Port: - Detailed Authentication Information: Logon Process: Advapi Authentication Package: Negotiate Transited Services: - Package Name (NTLM only): - Key Length: 0 This event is generated when a logon session is created. It is generated on the computer that was accessed. The subject fields indicate the account on the local system which requested the logon. This is most commonly a service such as the Server service, or a local process such as Winlogon.exe or Services.exe. The logon type field indicates the kind of logon that occurred. The most common types are 2 (interactive) and 3 (network). The New Logon fields indicate the account for whom the new logon was created, i.e. the account that was logged on. The network fields indicate where a remote logon request originated. Workstation name is not always available and may be left blank in some cases. The impersonation level field indicates the extent to which a process in the logon session can impersonate. The authentication information fields provide detailed information about this specific logon request. - Logon GUID is a unique identifier that can be used to correlate this event with a KDC event. - Transited services indicate which intermediate services have participated in this logon request. - Package name indicates which sub-protocol was used among the NTLM protocols. - Key length indicates the length of the generated session key. This will be 0 if no session key was requested.

Subject: Security ID: S-1-5-18 Account Name: LTRANPHD$ Account Domain: WORKGROUP Logon ID: 0x3e7 Logon Type: 5 Impersonation Level: %%1833 New Logon: Security ID: S-1-5-18 Account Name: SYSTEM Account Domain: NT AUTHORITY Logon ID: 0x3e7 Logon GUID: {00000000-0000-0000-0000-000000000000} Process Information: Process ID: 0x230 Process Name: C:\Windows\System32\services.exe Network Information: Workstation Name: Source Network Address: - Source Port: - Detailed Authentication Information: Logon Process: Advapi Authentication Package: Negotiate Transited Services: - Package Name (NTLM only): - Key Length: 0 This event is generated when a logon session is created. It is generated on the computer that was accessed. The subject fields indicate the account on the local system which requested the logon. This is most commonly a service such as the Server service, or a local process such as Winlogon.exe or Services.exe. The logon type field indicates the kind of logon that occurred. The most common types are 2 (interactive) and 3 (network). The New Logon fields indicate the account for whom the new logon was created, i.e. the account that was logged on. The network fields indicate where a remote logon request originated. Workstation name is not always available and may be left blank in some cases. The impersonation level field indicates the extent to which a process in the logon session can impersonate. The authentication information fields provide detailed information about this specific logon request. - Logon GUID is a unique identifier that can be used to correlate this event with a KDC event. - Transited services indicate which intermediate services have participated in this logon request. - Package name indicates which sub-protocol was used among the NTLM protocols. - Key length indicates the length of the generated session key. This will be 0 if no session key was requested.

It is generated on the computer that was accessed. The subject fields indicate the account on the local system which requested the logon. This is most commonly a service such as the Server service, or a local process such as Winlogon.exe or Services.exe. The logon type field indicates the kind of logon that occurred. The most common types are 2 (interactive) and 3 (network). The New Logon fields indicate the account for whom the new logon was created, i.e. the account that was logged on. The network fields indicate where a remote logon request originated. Workstation name is not always available and may be left blank in some cases. The impersonation level field indicates the extent to which a process in the logon session can impersonate. The authentication information fields provide detailed information about this specific logon request. - Logon GUID is a unique identifier that can be used to correlate this event with a KDC event. - Transited services indicate which intermediate services have participated in this logon request. - Package name indicates which sub-protocol was used among the NTLM protocols. - Key length indicates the length of the generated session key. This will be 0 if no session key was requested.

It is generated on the computer that was accessed. The subject fields indicate the account on the local system which requested the logon. This is most commonly a service such as the Server service, or a local process such as Winlogon.exe or Services.exe. The logon type field indicates the kind of logon that occurred. The most common types are 2 (interactive) and 3 (network). The New Logon fields indicate the account for whom the new logon was created, i.e. the account that was logged on. The network fields indicate where a remote logon request originated. Workstation name is not always available and may be left blank in some cases. The impersonation level field indicates the extent to which a process in the logon session can impersonate. The authentication information fields provide detailed information about this specific logon request. - Logon GUID is a unique identifier that can be used to correlate this event with a KDC event. - Transited services indicate which intermediate services have participated in this logon request. - Package name indicates which sub-protocol was used among the NTLM protocols. - Key length indicates the length of the generated session key. This will be 0 if no session key was requested.

It is generated on the computer that was accessed. The subject fields indicate the account on the local system which requested the logon. This is most commonly a service such as the Server service, or a local process such as Winlogon.exe or Services.exe. The logon type field indicates the kind of logon that occurred. The most common types are 2 (interactive) and 3 (network). The New Logon fields indicate the account for whom the new logon was created, i.e. the account that was logged on. The network fields indicate where a remote logon request originated. Workstation name is not always available and may be left blank in some cases. The impersonation level field indicates the extent to which a process in the logon session can impersonate. The authentication information fields provide detailed information about this specific logon request. - Logon GUID is a unique identifier that can be used to correlate this event with a KDC event. - Transited services indicate which intermediate services have participated in this logon request. - Package name indicates which sub-protocol was used among the NTLM protocols. - Key length indicates the length of the generated session key. This will be 0 if no session key was requested.

This is most commonly a service such as the Server service, or a local process such as Winlogon.exe or Services.exe. The logon type field indicates the kind of logon that occurred. The most common types are 2 (interactive) and 3 (network). The New Logon fields indicate the account for whom the new logon was created, i.e. the account that was logged on. The network fields indicate where a remote logon request originated. Workstation name is not always available and may be left blank in some cases. The impersonation level field indicates the extent to which a process in the logon session can impersonate. The authentication information fields provide detailed information

					about this specific logon request. - Logon GUID is a unique identifier that can be used to correlate this event with a KDC event. - Transited services indicate which intermediate services have participated in this logon request. - Package name indicates which sub-protocol was used among the NTLM protocols. - Key length indicates the length of the generated session key. This will be 0 if no session key was requested.

Subject: Security ID: S-1-0-0 Account Name: - Account Domain: - Logon ID: 0x0 Logon Type: 0 Impersonation Level: - New Logon: Security ID: S-1-5-18 Account Name: SYSTEM Account Domain: NT AUTHORITY Logon ID: 0x3e7 Logon GUID: {00000000-0000-0000-0000-000000000000} Process Information: Process ID: 0x4 Process Name: Network Information: Workstation Name: - Source Network Address: - Source Port: - Detailed Authentication Information: Logon Process: - Authentication Package: - Transited Services: - Package Name (NTLM only): - Key Length: 0 This event is generated when a logon session is created. It is generated on the computer that was accessed. The subject fields indicate the account on the local system which requested the logon. This is most commonly a service such as the Server service, or a local process such as Winlogon.exe or Services.exe. The logon type field indicates the kind of logon that occurred. The most common types are 2 (interactive) and 3 (network). The New Logon fields indicate the account for whom the new logon was created, i.e. the account that was logged on. The network fields indicate where a remote logon request originated. Workstation name is not always available and may be left blank in some cases. The impersonation level field indicates the extent to which a process in the logon session can impersonate. The authentication information fields provide detailed information about this specific logon request. - Logon GUID is a unique identifier that can be used to correlate this event with a KDC event. - Transited services indicate which intermediate services have participated in this logon request. - Package name indicates which sub-protocol was used among the NTLM protocols. - Key length indicates the length of the generated session key. This will be 0 if no session key was requested.

The most common types are 2 (interactive) and 3 (network). The New Logon fields indicate the account for whom the new logon was created, i.e. the account that was logged on. The network fields indicate where a remote logon request originated. Workstation name is not always available and may be left blank in some cases. The impersonation level field indicates the extent to which a process in the logon session can impersonate. The authentication information fields provide detailed information about this specific logon request. - Logon GUID is a unique identifier that can be used to correlate this event with a KDC event. - Transited services indicate which intermediate services have participated in this logon request. - Package name indicates which sub-protocol was used among the NTLM protocols. - Key length indicates the length of the generated session key. This will be 0 if no session key was requested.

This is most commonly a service such as the Server service, or a local process such as Winlogon.exe or Services.exe. The logon type field indicates the kind of logon that occurred. The most common types are 2 (interactive) and 3 (network). The New Logon fields indicate the account for whom the new logon was created, i.e. the account that was logged on. The network fields indicate where a remote logon request originated. Workstation name is not always available and may be left blank in some cases. The impersonation level field indicates the extent to which a process in the logon session can impersonate. The authentication information fields provide detailed information about this specific logon request. - Logon GUID is a unique identifier that can be used to correlate this event with a KDC event. - Transited services indicate which intermediate services have participated in this logon request. - Package name indicates

					which sub-protocol was used among the NTLM protocols. - Key length indicates the length of the generated session key. This will be 0 if no session key was requested.

The network fields indicate where a remote logon request originated. Workstation name is not always available and may be left blank in some cases. The impersonation level field indicates the extent to which a process in the logon session can impersonate. The authentication information fields provide detailed information about this specific logon request. - Logon GUID is a unique identifier that can be used to correlate this event with a KDC event. - Transited services indicate which intermediate services have participated in this logon request. - Package name indicates which sub-protocol was used among the NTLM protocols. - Key length indicates the length of the generated session key. This will be 0 if no session key was requested.

The most common types are 2 (interactive) and 3 (network). The New Logon fields indicate the account for whom the new logon was created, i.e. the account that was logged on. The network fields indicate where a remote logon request originated. Workstation name is not always available and may be left blank in some cases. The impersonation level field indicates the extent to which a process in the logon session can impersonate. The authentication information fields provide detailed information about this specific logon request. - Logon GUID is a unique identifier that can be used to correlate this event with a KDC event. - Transited services indicate which intermediate services have participated in this logon request. - Package name indicates which sub-protocol was used among the NTLM protocols. - Key length indicates the length of the generated session key. This will be 0 if no session key was requested.

Subject: Security ID: S-1-5-18 Account Name: LTRANPHD$ Account Domain: WORKGROUP Logon ID: 0x3e7 Logon Type: 5 Impersonation Level: %%1833 New Logon: Security ID: S-1-5-18 Account Name: SYSTEM Account Domain: NT AUTHORITY Logon ID: 0x3e7 Logon GUID: {00000000-0000-0000-0000-000000000000} Process Information: Process ID: 0x240 Process Name: C:\Windows\System32\services.exe Network Information: Workstation Name: Source Network Address: - Source Port: - Detailed Authentication Information: Logon Process: Advapi Authentication Package: Negotiate Transited Services: - Package Name (NTLM only): - Key Length: 0 This event is generated when a logon session is created. It is generated on the computer that was accessed. The subject fields indicate the account on the local system which requested the logon. This is most commonly a service such as the Server service, or a local process such as Winlogon.exe or Services.exe. The logon type field indicates the kind of logon that occurred. The most common types are 2 (interactive) and 3 (network). The New Logon fields indicate the account for whom the new logon was created, i.e. the account that was logged on. The network fields indicate where a remote logon request originated. Workstation name is not always available and may be left blank in some cases. The impersonation level field indicates the extent to which a process in the logon session can impersonate. The authentication information fields provide detailed information about this specific logon request. - Logon GUID is a unique identifier that can be used to correlate this event with a KDC event. - Transited services indicate which intermediate services have participated in this logon request. - Package name indicates which sub-protocol was used among the NTLM protocols. - Key length indicates the length of the generated session key. This will be 0 if no session key was requested.

The most common types are 2 (interactive) and 3 (network). The New Logon fields indicate the account for whom the new logon was created, i.e. the account that was logged on. The network fields indicate where a remote logon request originated. Workstation name is not always available and may be left blank in some cases. The impersonation level field indicates the extent to which a process in the logon session can impersonate. The authentication information fields provide detailed information about this specific logon request. - Logon GUID is a unique identifier that can be used to correlate this event with a KDC event. - Transited services indicate which intermediate services have participated in this logon request. - Package name indicates which sub-protocol was used among the NTLM protocols. - Key length indicates the length of the generated session key. This will be 0 if no session key was requested.

It is generated on the computer that was accessed. The subject fields indicate the account on the local system which requested the logon. This is most commonly a service such as the Server service, or a local process such as Winlogon.exe or Services.exe. The logon type field indicates the kind of logon that occurred. The most common types are 2 (interactive) and 3 (network). The New Logon fields indicate the account for whom the new logon was created, i.e. the account that was logged on. The network fields indicate where a remote logon request originated. Workstation name is not always available and may be left blank in some cases. The impersonation level field indicates the extent to which a process in the logon session can impersonate. The authentication information fields provide detailed information about this specific logon request. - Logon GUID is a unique identifier that can be used to correlate this event with a KDC event. - Transited services indicate which intermediate services have participated in this logon request. - Package name indicates which sub-protocol was used among the NTLM protocols. - Key length indicates the length of the generated session key. This will be 0 if no session key was requested.

It is generated on the computer that was accessed. The subject fields indicate the account on the local system which requested the logon. This is most commonly a service such as the Server service, or a local process such as Winlogon.exe or Services.exe. The logon type field indicates the kind of logon that occurred. The most common types are 2 (interactive) and 3 (network). The New Logon fields indicate the account for whom the new logon was created, i.e. the account that was logged on. The network fields indicate where a remote logon request originated. Workstation name is not always available and may be left blank in some cases. The impersonation level field indicates the extent to which a process in the logon session can impersonate. The authentication information fields provide detailed information about this specific logon request. - Logon GUID is a unique identifier that can be used to correlate this event with a KDC event. - Transited services indicate which intermediate services have participated in this logon request. - Package name indicates which sub-protocol was used among the NTLM protocols. - Key length indicates the length of the generated session key. This will be 0 if no session key was requested.

It is generated on the computer that was accessed. The subject fields indicate the account on the local system which requested the logon. This is most commonly a service such as the Server service, or a local process such as Winlogon.exe or Services.exe. The logon type field indicates the kind of logon that occurred. The most common types are 2 (interactive) and 3 (network). The New Logon fields indicate the account for whom the new logon was created, i.e. the account that was logged on. The network fields indicate where a remote logon request originated. Workstation name is not always available and may be left blank in some cases. The impersonation level field indicates the extent to which a process in the logon session can impersonate. The authentication information fields provide detailed information about this specific logon request. - Logon GUID is a unique identifier that can be used to correlate this event with a KDC event. - Transited services indicate which intermediate services have participated in this logon request. - Package name indicates which sub-protocol was used among the NTLM protocols. - Key length indicates the length of the generated session key. This will be 0 if no session key was requested.

Subject: Security ID: S-1-5-18 Account Name: LTRANPHD$ Account Domain: WORKGROUP Logon ID: 0x3e7 Logon Type: 5 Impersonation Level: %%1833 New Logon: Security ID: S-1-5-18 Account Name: SYSTEM Account Domain: NT AUTHORITY Logon ID: 0x3e7 Logon GUID: {00000000-0000-0000-0000-000000000000} Process Information: Process ID: 0x244 Process Name: C:\Windows\System32\services.exe Network Information: Workstation Name: Source Network Address: - Source Port: - Detailed Authentication Information: Logon Process: Advapi Authentication Package: Negotiate Transited Services: - Package Name (NTLM only): - Key Length: 0 This event is generated when a logon session is created. It is generated on the computer that was accessed. The subject fields indicate the account on the local system which requested the logon. This is most commonly a service such as the Server service, or a local process such as Winlogon.exe or Services.exe. The logon type field indicates the kind of logon that occurred. The most common types are 2 (interactive) and 3 (network). The New Logon fields indicate the account for whom the new logon was created, i.e. the account that was logged on. The network fields indicate where a remote logon request originated. Workstation name is not always available and may be left blank in some cases. The impersonation level field indicates the extent to which a process in the logon session can impersonate. The authentication information fields provide detailed information about this specific logon request. - Logon GUID is a unique identifier that can be used to correlate this event with a KDC event. - Transited services indicate which intermediate services have participated in this logon request. - Package name indicates which sub-protocol was used among the NTLM protocols. - Key length indicates the length of the generated session key. This will be 0 if no session key was requested.

Subject: Security ID: S-1-5-18 Account Name: LTRANPHD$ Account Domain: WORKGROUP Logon ID: 0x3e7 Logon Type: 5 Impersonation Level: %%1833 New Logon: Security ID: S-1-5-18 Account Name: SYSTEM Account Domain: NT AUTHORITY Logon ID: 0x3e7 Logon GUID: {00000000-0000-0000-0000-000000000000} Process Information: Process ID: 0x234 Process Name: C:\Windows\System32\services.exe Network Information: Workstation Name: Source Network Address: - Source Port: - Detailed Authentication Information: Logon Process: Advapi Authentication Package: Negotiate Transited Services: - Package Name (NTLM only): - Key Length: 0 This event is generated when a logon session is created. It is generated on the computer that was accessed. The subject fields indicate the account on the local system which requested the logon. This is most commonly a service such as the Server service, or a local process such as Winlogon.exe or Services.exe. The logon type field indicates the kind of logon that occurred. The most common types are 2 (interactive) and 3 (network). The New Logon fields indicate the account for whom the new logon was created, i.e. the account that was logged on. The network fields indicate where a remote logon request originated. Workstation name is not always available and may be left blank in some cases. The impersonation level field indicates the extent to which a process in the logon session can impersonate. The authentication information fields provide detailed information about this specific logon request. - Logon GUID is a unique identifier that can be used to correlate this event with a KDC event. - Transited services indicate which intermediate services have participated in this logon request. - Package name indicates which sub-protocol was used among the NTLM protocols. - Key length indicates the length of the generated session key. This will be 0 if no session key was requested.

The network fields indicate where a remote logon request originated. Workstation name is not always available and may be left blank in some cases. The impersonation level field indicates the extent to which a process in the logon session can impersonate. The authentication information fields provide detailed information about this specific logon request. - Logon GUID is a unique identifier that can be used to correlate this event with a KDC event. - Transited services indicate which intermediate services have participated in this logon request. - Package name indicates which sub-protocol was used among the NTLM protocols. - Key length indicates the length of the generated session key. This will be 0 if no session key was requested.
Security	Audit	12544	2015-04-27	Microsoft-Windows-Security-	4624: An account was successfully logged on. The impersonation level field indicates the extent to which a process in the logon session can impersonate. The authentication information fields provide detailed information about this specific logon request. - Logon GUID is a unique identifier that can be used to correlate this event with a KDC event. - Transited services indicate which intermediate services have participated in this logon request. - Package name indicates which sub-protocol was used among the NTLM protocols. - Key length

					indicates the length of the generated session key. This will be 0 if no session key was requested.

It is generated on the computer that was accessed. The subject fields indicate the account on the local system which requested the logon. This is most commonly a service such as the Server service, or a local process such as Winlogon.exe or Services.exe. The logon type field indicates the kind of logon that occurred. The most common types are 2 (interactive) and 3 (network). The New Logon fields indicate the account for whom the new logon was created, i.e. the account that was logged on. The network fields indicate where a remote logon request originated. Workstation name is not always available and may be left blank in some cases. The impersonation level field indicates the extent to which a process in the logon session can impersonate. The authentication information fields provide detailed information about this specific logon request. - Logon GUID is a unique identifier that can be used to correlate this event with a KDC event. - Transited services indicate which intermediate services have participated in this logon request. - Package name indicates which sub-protocol was used among the NTLM protocols. - Key length indicates the length of the generated session key. This will be 0 if no session key was requested.

Subject: Security ID: S-1-5-18 Account Name: LTRANPHD$ Account Domain: WORKGROUP Logon ID: 0x3e7 Logon Type: 2 Impersonation Level: %%1833 New Logon: Security ID: S-1-5-21-1888849264-3803429180-4108621888-1001 Account Name: Liem Account Domain: LTRANPHD Logon ID: 0x1abf6 Logon GUID: {00000000-0000-0000-0000-000000000000} Process Information: Process ID: 0x208 Process Name: C:\Windows\System32\winlogon.exe Network Information: Workstation Name: LTRANPHD Source Network Address: 127.0.0.1 Source Port: 0 Detailed Authentication Information: Logon Process: User32 Authentication Package: Negotiate Transited Services: - Package Name (NTLM only): - Key Length: 0 This event is generated when a logon session is created. It is generated on the computer that was accessed. The subject fields indicate the account on the local system which requested the logon. This is most commonly a service such as the Server service, or a local process such as Winlogon.exe or Services.exe. The logon type field indicates the kind of logon that occurred. The most common types are 2 (interactive) and 3 (network). The New Logon fields indicate the account for whom the new logon was created, i.e. the account that was logged on. The network fields indicate where a remote logon request originated. Workstation name is not always available and may be left blank in some cases. The impersonation level field indicates the extent to which a process in the logon session can impersonate. The authentication information fields provide detailed information about this specific logon request. - Logon GUID is a unique identifier that can be used to correlate this event with a KDC event. - Transited services indicate which intermediate services have participated in this logon request. - Package name indicates which sub-protocol was used among the NTLM protocols. - Key length indicates the length of the generated session key. This will be 0 if no session key was requested.
